JOURNAL OF AIRCRAFT
Vol. 31, No. 6, November–December 1994

1994 *Journal of Aircraft* Index

How to Use the Index

In the Subject Index, pages 1438–1445, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, pages 1446 and 1447, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 1448–1455, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1994, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Integration of the Supersonic Kernel Function C94-226
Effect of Leeward Flow Dividers on the Wing Rock of a Delta Wing C94-225
Flow Study of Supersonic Wing-Nacelle Configuration C94-222
Inverse Solutions of the Prandtl-Meyer Function C94-221
Pneumatic Concept for Tip-Stall Control of Cranked-Arrow Wings C94-213
Effect of Underwing Frost on a Transport Aircraft Airfoil at Flight Reynolds Number C94-212
Forebody Flow Control on a Full-Scale F/A-18 Aircraft C94-211
Analysis of a Higher Harmonic Control Test to Reduce Blade Vortex Interaction Noise C94-208
Study of an Airfoil with a Flap and Spoiler C94-205
Separation Control on High-Lift Airfoils via Micro-Vortex Generators C94-204
Unstructured Grid Solutions to a Wing/Pylon/Store Configuration C94-200
Experimental Investigation of the Flowfield About an Upswept Afterbody C94-199
Progress in High-Lift Aerodynamic Calculations C94-193
Effect of Ground and Ceiling Planes on Shape of Energized Wakes C94-190
Passive Porosity with Free and Fixed Separation on a Tangent-Ogive Forebody C94-186
Application of Circulation Control to Advanced Subsonic Transport Aircraft, Part I: Airfoil Development C94-177
Application of Circulation Control to Advanced Subsonic Transport Aircraft, Part II: Transport Application C94-178
Aerodynamic Effects of Delta Planform Tip Sails on Wing Performance C94-176
Experimental Investigations on Limit Cycle Wing Rock of Slender Wings C94-175
Two-Point Transonic Airfoil Design Using Optimization for Improved Off-Design Performance C94-174
Waveriders with Finlets C94-173
Two-Variable Method for Blockage Wall Interference in a Circular Tunnel C94-172
Aerodynamic Characteristics of Strake Vortex Flaps on a Strake-Wing Configuration C94-169
State-Space Representation of Aerodynamic Characteristics of an Aircraft at High Angles of Attack C94-168
Preliminary Assessment of Tunnel Wall Interference in the NDA Cryogenic Wind Tunnel C94-163
Aerodynamic Sensitivity Coefficients Using the Three-Dimensional Full Potential Equation C94-162
Repeatability of Ice Shapes in the NASA Lewis Icing Research Tunnel C94-160
Numerical Simulation of Incidence and Sweep Effects on Delta Wing Vortex Breakdown C94-158
Numerical Simulation of Steady and Unsteady, Vorticity-Dominated Aerodynamic Interference C94-156
Investigations of Propulsion Integration Interference Effects on a Transport Aircraft Configuration C94-155
Effect of a Fuselage on Delta Wing Vortex Breakdown C94-152
Experimental Investigation of Vortex Breakdown over a Sideslipping Canard-Configured Aircraft Model C94-150
Experimental Investigation of Vortex Flaps on Thick Delta Wings C94-146
Side-Force Control on a Diamond Forebody at High Angles of Attack C94-131
Flowfield Study of a Close-Coupled Canard Configuration C94-130
Quantitative Study of Unsteady Compressible Flow on an Oscillating Airfoil C94-128
Subsonic Static and Dynamic Stability Characteristics of a NASP Configuration C94-126
Low-Speed Characteristics for the Wing-Canard Configuration of the International Vortex Flow Experiment C94-125
Prediction of Ice Accretion with Viscous Effects on Aircraft Wings C94-123
Experimental Investigation of Rotor/Lifting Surface Interactions C94-122
Side Force Augmentation at High Angle of Attack from Pneumatic Vortex Control C94-118
Locally Interactive Laminar Separation Bubble Model C94-116
Jet Ground Vortex Formation by Annular Jets C94-115
Tailoring Stall Characteristics Using Leading-Edge Droop Modifications C94-111
Severe Turbulence and Maneuvering from Airline Flight Records C94-109
Unsteady Blade Pressures on a Propfan: Predicted and Measured Compressibility Effects C94-106
Leading-Edge Vortex Breakdown for Wing Planforms with the Same Slenderness Ratio C94-101
Computation of Three-Dimensional Hypersonic Flows in Chemical Nonequilibrium C94-092
Measured and Theoretical Supersonic Dynamic Stability Characteristics of a National Aero-Space Plane Configuration C94-088
Wind-Tunnel Test Techniques for Unmanned Aerial Vehicle Separation Investigations C94-086
Drag and Wake Modification of Axisymmetric Bluff Bodies Using Coanda Blowing C94-084
Lift Enhancement of an Airfoil Using a Gurney Flap and Vortex Generators C94-080
Loading Characteristics of Finite Wings Undergoing Rapid Unsteady Motions: A Theoretical Treatment C94-073
Computational Study of the F-5A Forebody Emphasizing Directional Stability C94-072
Chine-Shaped Forebody Effects on Directional Stability at High-alpha C94-071
Pressure Measurements on a Forward-Swept Wing-Canard Configuration C94-069
Tail Load Calculations for Light Airplanes C94-068

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Integration of the Supersonic Kernel Function C94-226
Effect of Leeward Flow Dividers on the Wing Rock of a Delta Wing C94-225
Flow Study of Supersonic Wing-Nacelle Configuration C94-222
Inverse Solutions of the Prandtl-Meyer Function C94-221
Pneumatic Concept for Tip-Stall Control of Cranked-Arrow Wings C94-213
Effect of Underwing Frost on a Transport Aircraft Airfoil at Flight Reynolds Number C94-212
Forebody Flow Control on a Full-Scale F/A-18 Aircraft C94-211
Analysis of a Higher Harmonic Control Test to Reduce Blade Vortex Interaction Noise C94-208
Study of an Airfoil with a Flap and Spoiler C94-205
Separation Control on High-Lift Airfoils via Micro-Vortex Generators C94-204
Unstructured Grid Solutions to a Wing/Pylon/Store Configuration C94-200
Experimental Investigation of the Flowfield About an Upswept Afterbody C94-199
Progress in High-Lift Aerodynamic Calculations C94-193
Effect of Ground and Ceiling Planes on Shape of Energized Wakes C94-190
Passive Porosity with Free and Fixed Separation on a Tangent-Ogive Forebody C94-186
Application of Circulation Control to Advanced Subsonic Transport Aircraft, Part I: Airfoil Development C94-177
Application of Circulation Control to Advanced Subsonic Transport Aircraft, Part II: Transport Application C94-178
Aerodynamic Effects of Delta Planform Tip Sails on Wing Performance C94-176
Experimental Investigations on Limit Cycle Wing Rock of Slender Wings C94-175
Two-Point Transonic Airfoil Design Using Optimization for Improved Off-Design Performance C94-174
Waveriders with Finlets C94-173
Two-Variable Method for Blockage Wall Interference in a Circular Tunnel C94-172
Aerodynamic Characteristics of Strake Vortex Flaps on a Strake-Wing Configuration C94-169
State-Space Representation of Aerodynamic Characteristics of an Aircraft at High Angles of Attack C94-168
Preliminary Assessment of Tunnel Wall Interference in the NDA Cryogenic Wind Tunnel C94-163
Aerodynamic Sensitivity Coefficients Using the Three-Dimensional Full Potential Equation C94-162
Repeatability of Ice Shapes in the NASA Lewis Icing Research Tunnel C94-160
Numerical Simulation of Incidence and Sweep Effects on Delta Wing Vortex Breakdown C94-158
Numerical Simulation of Steady and Unsteady, Vorticity-Dominated Aerodynamic Interference C94-156
Investigations of Propulsion Integration Interference Effects on a Transport Aircraft Configuration C94-155
Effect of a Fuselage on Delta Wing Vortex Breakdown C94-152
Experimental Investigation of Vortex Breakdown over a Sideslipping Canard-Configured Aircraft Model C94-150
Experimental Investigation of Vortex Flaps on Thick Delta Wings C94-146
Side-Force Control on a Diamond Forebody at High Angles of Attack C94-131
Flowfield Study of a Close-Coupled Canard Configuration C94-130
Quantitative Study of Unsteady Compressible Flow on an Oscillating Airfoil C94-128
Subsonic Static and Dynamic Stability Characteristics of a NASP Configuration C94-126
Low-Speed Characteristics for the Wing-Canard Configuration of the International Vortex Flow Experiment C94-125
Prediction of Ice Accretion with Viscous Effects on Aircraft Wings C94-123
Experimental Investigation of Rotor/Lifting Surface Interactions C94-122
Side Force Augmentation at High Angle of Attack from Pneumatic Vortex Control C94-118
Locally Interactive Laminar Separation Bubble Model C94-116
Jet Ground Vortex Formation by Annular Jets C94-115
Tailoring Stall Characteristics Using Leading-Edge Droop Modifications C94-111
Severe Turbulence and Maneuvering from Airline Flight Records C94-109
Unsteady Blade Pressures on a Propfan: Predicted and Measured Compressibility Effects C94-106
Leading-Edge Vortex Breakdown for Wing Planforms with the Same Slenderness Ratio C94-101
Computation of Three-Dimensional Hypersonic Flows in Chemical Nonequilibrium C94-092
Measured and Theoretical Supersonic Dynamic Stability Characteristics of a National Aero-Space Plane Configuration C94-088
Wind-Tunnel Test Techniques for Unmanned Aerial Vehicle Separation Investigations C94-086
Drag and Wake Modification of Axisymmetric Bluff Bodies Using Coanda Blowing C94-084
Lift Enhancement of an Airfoil Using a Gurney Flap and Vortex Generators C94-080
Loading Characteristics of Finite Wings Undergoing Rapid Unsteady Motions: A Theoretical Treatment C94-073
Computational Study of the F-5A Forebody Emphasizing Directional Stability C94-072
Chine-Shaped Forebody Effects on Directional Stability at High-alpha C94-071
Pressure Measurements on a Forward-Swept Wing-Canard Configuration C94-069
Tail Load Calculations for Light Airplanes C94-068

Wake Curvature and Airfoil Lift C94-067
Aerodynamic Properties of Crescent Wing Planforms C94-066
Aircraft Accident Flight Path Simulation and Animation C94-049
Computational Analysis of Off-Design Waveriders C94-045
Experimental Studies of Vortex Flaps and Vortex Plates C94-042
Vortex-Wing Interaction of a Close-Coupled Canard Configuration C94-041
Propulsion-Induced Aerodynamic Effects Measured with a Full-Scale STOVL Model C94-040
Forebody Vortex Control for Wing Rock Suppression C94-039
Unsteady Lift of a Flapped Airfoil by Indicial Concepts C94-038
Drag Reduction of Airplane Fuselages Through Shaping by the Inverse Method C94-037
Prediction of Ice Shapes and Their Effect on Airfoil Drag C94-035
Computational Analysis of a Single Jet Impingement Ground Effect Lift Loss C94-034
Quantitative Low-Speed Wake Surveys C94-033
Simulation Model for Tail Rotor Failure C94-026
Effect of Wind-Tunnel Walls on Airfoil Droplet Impingement C94-023
Roll Moment Characteristics of Asymmetric Tangential Leading-Edge Blowing on a Delta Wing C94-021
Aircraft Spoiler Effects Under Wind Shear C94-020
Aerodynamics of Airfoils with Vortex Trapped by Two Spanwise Fences C94-019
Effect of Canard Deflection on Close-Coupled Canard-Wing-Body Aerodynamics C94-018
Static and Dynamic Coefficients of a Cross-Type Parachute C94-017
Variable-Complexity Aerodynamic Optimization of a High-Speed Civil Transport Wing C94-014
Method for the Prediction of Wing Maximum Lift C94-013
Investigation of Three-Dimensional Separation at Wing/Body Junctions in Supersonic Flows C94-008
Experimental Study of Pneumatic Control of Forebody Vortices at High Alpha C94-006
Aerodynamic Design of Supersonic Cruise Wings with a Calibrated Linearized Theory C94-004
Sonic Boom of the Oblique Flying Wing C94-002

Aeroelasticity and Aeroservoelasticity

Integration of the Supersonic Kernel Function C94-226
Static Aeroelastic Characteristics of a Composite Wing C94-218
Postinstability Behavior of a Two-Dimensional Airfoil with a Structural Nonlinearity C94-215
Analysis of a Higher Harmonic Control Test to Reduce Blade Vortex Interaction Noise C94-208
Limit Cycle Phenomena in Computational Transonic Aeroelasticity C94-195
Continuous Gust Response and Sensitivity Derivatives Using State-Space Models C94-183
Direct Solution of the Aeroelastic Stability Equations C94-142
Parametric Studies of Bearing Strength for Fiber/Metal Laminates C94-134
Turbulent Flow Structure Associated with Vortex-Induced Fin Buffeting C94-112
Doublet-Point Method for Supersonic Unsteady Aerodynamics of Nonplanar Lifting-Surfaces C94-108
Whirl-Flutter Suppression in Advanced Turboprops and Propfans by Active Control Techniques C94-104
Comprehensive Model of Anisotropic Composite Aircraft Wings Suitable for Aeroelastic Analyses C94-103
Unstructured Mesh Quality Assessment and Upwind Euler Solution Algorithm Validation C94-095
Parameter Estimates of an Aeroelastic Aircraft as Affected by Model Simplifications C94-062
Buffet-Induced Structural/Flight-Control System Interaction of the X-29A Aircraft C94-057
Time Simulation of Flutter with Large Stiffness Changes C94-052
Modal Coordinates for Aeroelastic Analysis with Large Local Structural Variations C94-051
Panel Flutter Suppression Using Adaptive Material Actuators C94-028
Integration of Structural Optimization in the General Design Process for Aircraft C94-027
Integrated Structure/Control Concepts for Oblique Wing Roll Control and Trim C94-015
Measurement of Unsteady Airloads on an Oscillating Engine and a Wing/Engine Combination C94-012

Aerospace Plane

Parametric Studies of Bearing Strength for Fiber/Metal Laminates C94-134
Subsonic Static and Dynamic Stability Characteristics of a NASP Configuration C94-126
Computation of Three-Dimensional Hypersonic Flows in Chemical Nonequilibrium C94-092
Computational Analysis of Off-Design Waveriders C94-045
Nonslender Waveriders C94-016
Nonlinear Response and Sonic Fatigue of National Aerospace Space Plane Surface Panels C94-001

Cabin Environment, Crew Training, and Life Support

Active Sound Attenuation Across a Double Wall Structure C94-029

Civil Missions and Transportation

Application of Circulation Control to Advanced Subsonic Transport Aircraft, Part II: Transport Application C94-178
Selecting and Management of Fire Fighter Aircraft C94-170

Configuration Design

Design Constraints in the Payload-Range Diagram of Ultrahigh Capacity Transport Airplanes C94-197
Passive Porosity with Free and Fixed Separation on a Tangent-Ogive Forebody C94-186
Application of Circulation Control to Advanced Subsonic Transport Aircraft, Part I: Airfoil Development C94-177
Application of Circulation Control to Advanced Subsonic Transport Aircraft, Part II: Transport Application C94-178
Two-Point Transonic Airfoil Design Using Optimization for Improved Off-Design Performance C94-174
Tailoring Stall Characteristics Using Leading-Edge Droop Modifications C94-111
Chine-Shaped Forebody Effects on Directional Stability at High-alpha C94-071
Aircraft Landing Gear Positioning Concerning Abnormal Landing Cases C94-060
Supersonic Transport Wing Minimum Weight Design Integrating Aerodynamics and Structures C94-043
Nonslender Waveriders C94-016
Integrated Structure/Control Concepts for Oblique Wing Roll Control and Trim C94-015
Variable-Complexity Aerodynamic Optimization of a High-Speed Civil Transport Wing C94-014
Sonic Boom of the Oblique Flying Wing C94-002

Deceleration Systems

Radial Reefing Method for Accelerated and Controlled Parachute Opening C94-171
Comparison of Electrostatic and Aerodynamic Forces During Parachute Opening C94-164
Aircraft Spoiler Effects Under Wind Shear C94-020
Static and Dynamic Coefficients of a Cross-Type Parachute C94-017

Economics

Design Constraints in the Payload-Range Diagram of Ultrahigh Capacity Transport Airplanes C94-197
Selecting and Management of Fire Fighter Aircraft C94-170
Parametric Studies of Bearing Strength for Fiber/Metal Laminates C94-134

Flight Control Integration

Development and Flight Test of a Deployable Precision Landing System C94-167
Design of Optimized Airfoils in Subcritical Flow C94-100
Fundamentals and Similarity Transformations of Vectored Aircraft C94-024

Flight Mechanics

Stratospheric Towed Vehicle Concept C94-206
Minimum Sink-Speed in Power-Off Glide C94-188
Offset Thrust Axes and Pitch Stability C94-185
Experimental Investigations on Limit Cycle Wing Rock of Slender Wings C94-175
State-Space Representation of Aerodynamic Characteristics of an Aircraft at High Angles of Attack C94-168
Time-Accurate Computational Fluid Dynamics Approach to Transonic Store Separation Trajectory Prediction C94-127
Wind-Tunnel Test Techniques for Unmanned Aerial Vehicle Separation Investigations C94-086
Evaluation of Parameter Estimation Methods for Unstable Aircraft C94-075
Effects of Model Scale on Flight Characteristics and Design Parameters C94-063

Aircraft Accident Flight Path Simulation and Animation C94-049
Simulation Model for Tail Rotor Failure C94-026
Experimental Study of Pneumatic Control of Forebody Vortices at High Alpha C94-006
Application of Bifurcation Theory to the High-Angle-of-Attack Dynamics of the F-14 C94-003
Comment on "Model Flight Tests and Neutral Point Determination" C92-133

Flight Operations

Selecting and Management of Fire Fighter Aircraft C94-170
Severe Turbulence and Maneuvering from Airline Flight Records C94-109

General Aviation

Pilot Weather Advisor System C94-192
Tailoring Stall Characteristics Using Leading-Edge Droop Modifications C94-111
Tail Load Calculations for Light Airplanes C94-068

Ground Effect Machines

Analysis of Aerodynamics of Airfoils Moving over a Wavy Wall C94-050

Landing Dynamics

Development and Flight Test of a Deployable Precision Landing System C94-167
Aircraft Landing Gear Positioning Concerning Abnormal Landing Cases C94-060

Lighter-Than-Air Systems

Polar Patrol Balloon C94-196
Hunting Phenomena of the Balloon Motions Observed over Antarctica C94-079

Man/Machine Interface

Flight Control System Mode Transitions Influence on Handling Qualities and Task Performance C94-157
Takeoff Performance Monitoring System Display Options C94-098

Noise

Model Ducted Propulsor Noise Characteristics at Takeoff Conditions C94-161
Recent Studies of Rotorcraft Blade-Vortex Interaction Noise C94-153
Hover Acoustic Characteristics of the XV-15 with Advanced Technology Blades C94-107
Computation of Supersonic Jet Mixing Noise for an Axisymmetric Convergent-Divergent Nozzle C94-089
Active Sound Attenuation Across a Double Wall Structure C94-029
Sonic Boom of the Oblique Flying Wing C94-002

Performance

Stratospheric Towed Vehicle Concept C94-206
Separation Control on High-Lift Airfoils via Micro-Vortex Generators C94-204
Design Constraints in the Payload-Range Diagram of Ultrahigh Capacity Transport Airplanes C94-197
Minimum Sink-Speed in Power-Off Glide C94-188
Comparing Aircraft Agility Using Mahalanobis Distances C94-151
Numerical Method for Estimation of Propeller Efficiencies C94-149
Propulsion-Induced Aerodynamic Effects Measured with a Full-Scale STOVL Model C94-040
Nonslender Waveriders C94-016

Powerplant Integration

Whirl-Flutter Suppression in Advanced Turboprops and Propfans by Active Control Techniques C94-104
Inlet Drag Prediction for Aircraft Conceptual Design C94-091

Propeller and Rotor Systems

Model Ducted Propulsor Noise Characteristics at Takeoff Conditions C94-161
Numerical Method for Estimation of Propeller Efficiencies C94-149
Simple Equations for Helical Vortex Wakes C94-148
Whirl-Flutter Suppression in Advanced Turboprops and Propfans by Active Control Techniques C94-104
Simulation Model for Tail Rotor Failure C94-026
Frequency-Domain Analysis of Fluctuating Pressure on a Pusher Propeller Blade Surface C94-005

Rotorcraft

Using Adaptive Structures to Attenuate Rotary Wing Aeroelastic Response C94-179
Recent Studies of Rotorcraft Blade-Vortex Interaction Noise C94-153
Study of Dynamic Stall Using Real-Time Interferometry C94-147
Several Considerations Regarding the Variable Blade Length Rotor C94-140
Identification of Helicopter Component Loads Using Multiple Regression C94-133
Experimental Investigation of Rotor/Lifting Surface Interactions C94-122
Hover Acoustic Characteristics of the XV-15 with Advanced Technology Blades C94-107
Survey and Comparison of Engineering Beam Theories for Helicopter Rotor Blades C94-070
Unsteady Lift of a Flapped Airfoil by Indicial Concepts C94-038

Safety

Takeoff Performance Monitoring System Display Options C94-098
Influence of Aerodynamic Forces in Ice Shedding C94-077
Aircraft Landing Gear Positioning Concerning Abnormal Landing Cases C94-060
Investigation of Monte Carlo Simulation in FAA Program KRASH C94-048

Simulation

State-Space Representation of Aerodynamic Characteristics of an Aircraft at High Angles of Attack C94-168
Flight Control System Mode Transitions Influence on Handling Qualities and Task Performance C94-157
Prediction of Ice Accretion with Viscous Effects on Aircraft Wings C94-123
Pilot Evaluations of Augmented Flight Simulator Motion C94-119

Stealth

Airfoil Shaping for Reduced Radar Cross Section C94-114

STOL/VTOL/STOVL

Effect of Ground and Ceiling Planes on Shape of Energized Wakes C94-190
Several Considerations Regarding the Variable Blade Length Rotor C94-140
Interrupted Jet as a Candidate for Mixing Enhancement in Aircraft Ejectors C94-117
Jet Ground Vortex Formation by Annular Jets C94-115
Reduction in Size and Unsteadiness of VTOL Ground Vortices by Ground Fences C94-085
Propulsion-Induced Aerodynamic Effects Measured with a Full-Scale STOVL Model C94-040
Computational Analysis of a Single Jet Impingement Ground Effect Lift Loss C94-034
Calculations of Hot Gas Ingestion for a STOVL Aircraft Model C94-031

Structural Design (Including Loads)

Static Aeroelastic Characteristics of a Composite Wing C94-218
Brief History of Gust Models for Aircraft Design C94-189
Continuous Gust Response and Sensitivity Derivatives Using State-Space Models C94-183
Analytic Sensitivities for Shape Optimization in Equivalent Plate Structural Wing Models C94-137
Lessons from Application of Equivalent Plate Structural Modeling to an HSCT Wing C94-136
Loading Characteristics of Finite Wings Undergoing Rapid Unsteady Motions: A Theoretical Treatment C94-073
Investigation of Monte Carlo Simulation in FAA Program KRASH C94-048
Variable-Complexity Aerodynamic Optimization of a High-Speed Civil Transport Wing C94-014

Structural Materials

Fatigue Crack Propagation in Aerospace Aluminum Alloys C94-105

System Effectiveness

Numerical Method for Estimation of Propeller Efficiencies C94-149
Bombardment Analysis Method for Assessing Truss System Combat Survivability C94-055

Testing, Flight and Ground

Flow Visualization Studies on Sidewall Effects in Two-Dimensional Transonic Airfoil Testing C94-191
Offset Thrust Axes and Pitch Stability C94-185

Two-Variable Method for Blockage Wall Interference in a Circular Tunnel C94-172
Simulation and Flight Test Evaluation of Head-Up-Display Guidance for Harrier Approach Transitions C94-165
Repeatability of Ice Shapes in the NASA Lewis Icing Research Tunnel C94-160
Flight Loads Test of the Indigenous Defensive Fighter C94-135
Subsonic Static and Dynamic Stability Characteristics of a NASP Configuration C94-126
Hover Acoustic Characteristics of the XV-15 with Advanced Technology Blades C94-107
Measured and Theoretical Supersonic Dynamic Stability Characteristics of a National Aero-Space Plane Configuration C94-088
Wind-Tunnel Test Techniques for Unmanned Aerial Vehicle Separation Investigations C94-086
Joined-Wing Model Vibrations Using PC-Based Modal Testing and Finite Element Analysis C94-061
In-Flight Velocity Measurements Using Laser Doppler Anemometry C94-059
Buffet-Induced Structural/Flight-Control System Interaction of the X-29A Aircraft C94-057
Effects of Thrust Line Offset on Neutral Point Determination in Flight Testing C94-047
Quantitative Low-Speed Wake Surveys C94-033
Effect of Wind-Tunnel Walls on Airfoil Droplet Impingement C94-023
Comment on "Model Flight Tests and Neutral Point Determination" C92-133

Vibration

Joined-Wing Model Vibrations Using PC-Based Modal Testing and Finite Element Analysis C94-061
Buffet-Induced Structural/Flight-Control System Interaction of the X-29A Aircraft C94-057
Panel Flutter Suppression Using Adaptive Material Actuators C94-028
Multidimensional Mount Effectiveness for Vibration Isolation C94-025

Weather Hazards

Effect of Underwing Frost on a Transport Aircraft Airfoil at Flight Reynolds Number C94-212
Pilot Weather Advisor System C94-192
Prediction of Ice Accretion with Viscous Effects on Aircraft Wings C94-123
Severe Turbulence and Maneuvering from Airline Flight Records C94-109
Influence of Aerodynamic Forces in Ice Shedding C94-077
Development of an Improved Model for Runback Water on Aircraft Surfaces C94-036
Effect of Wind-Tunnel Walls on Airfoil Droplet Impingement C94-023
Aircraft Spoiler Effects Under Wind Shear C94-020
Remote Sensing Observations of Winter Aircraft Icing Conditions: A Case Study C94-010

Energy

Wind Power

Simple Equations for Helical Vortex Wakes C94-148

Fluid Dynamics

Aeroacoustics

Analysis of a Higher Harmonic Control Test to Reduce Blade Vortex Interaction Noise C94-208
Model Ducted Propulsor Noise Characteristics at Takeoff Conditions C94-161
Recent Studies of Rotorcraft Blade-Vortex Interaction Noise C94-153
Computation of Supersonic Jet Mixing Noise for an Axisymmetric Convergent-Divergent Nozzle C94-089
Active Sound Attenuation Across a Double Wall Structure C94-029
Control of Cavity Flow by Upstream Mass-Injection C94-022
Suppression of Flow-Induced Pressure Oscillations in Cavities C94-011
Frequency-Domain Analysis of Fluctuating Pressure on a Pusher Propeller Blade Surface C94-005

Boundary Layers and Heat Transfer—Laminar

Locally Interactive Laminar Separation Bubble Model C94-116

Boundary Layers and Heat Transfer—Turbulent

Turbulence Model Evaluation for Use with Supercritical Airfoils C94-141

Boundary-Layer Stability and Transition

Experiments on the Automatic Control of Boundary-Layer Transition C94-219
Engineering Transition Prediction for a Hypersonic Axisymmetric Boundary Layer C94-210
Side Force Augmentation at High Angle of Attack from Pneumatic Vortex Control C94-118
Separation Bubble Model for Low Reynolds Number Airfoil Applications C94-110
Calculation of Three-Dimensional Low Reynolds Number Flows C94-083
Computational Study of Transition Front on a Swept Wing Leading-Edge Model C94-009

Computational Fluid Dynamics

Navier-Stokes Prediction of Large-Amplitude Delta-Wing Roll Oscillations C94-207
Unstructured Grid Solutions to a Wing/Pylon/Store Configuration C94-200
Computation of the Poststall Behavior of a Circulation Controlled Airfoil C94-198
Progress in High-Lift Aerodynamic Calculations C94-193
Two-Point Transonic Airfoil Design Using Optimization for Improved Off-Design Performance C94-174
Interpretation of Waverider Performance Data Using Computational Fluid Dynamics C94-166
Numerical Simulation of Incidence and Sweep Effects on Delta Wing Vortex Breakdown C94-158
Effect of Sidewall Boundary Layer on Transonic Flow over a Wing C94-145
Turbulence Model Evaluation for Use with Supercritical Airfoils C94-141
Forebody Tangential Slot Blowing on an Aircraft Geometry C94-132
Time-Accurate Computational Fluid Dynamics Approach to Transonic Store Separation Trajectory Prediction C94-127
Unsteady Blade Pressures on a Propfan: Predicted and Measured Compressibility Effects C94-106
Design of Optimized Airfoils in Subcritical Flow C94-100
Numerical Investigations on Two-Dimensional Canard-Wing Aerodynamic Interference C94-099
Two-Dimensional Euler Zonal Method Using Composite Structured and Unstructured Meshes C94-096
Navier-Stokes Computations for Oscillating Control Surfaces C94-093
Computation of Three-Dimensional Hypersonic Flows in Chemical Nonequilibrium C94-092
Calculation of Three-Dimensional Low Reynolds Number Flows C94-083
Unsteady Aerodynamic Characteristics of a Dual-Element Airfoil C94-078
Influence of Aerodynamic Forces in Ice Shedding C94-077
Computational Analysis of Off-Design Waveriders C94-045
Vortex-Wing Interaction of a Close-Coupled Canard Configuration C94-041
Drag Reduction of Airplane Fuselages Through Shaping by the Inverse Method C94-037
Unsteady Vortex Structure over a Delta Wing C94-032
Calculations of Hot Gas Ingestion for a STOVL Aircraft Model C94-031
Effect of Canard Deflection on Close-Coupled Canard-Wing-Body Aerodynamics C94-018
Investigation of Three-Dimensional Separation at Wing/Body Junctions in Supersonic Flows C94-008
Sonic Boom Predictions Using a Solution-Adaptive Full-Potential Code C94-007

Hydrodynamics

Hunting Phenomena of the Balloon Motions Observed over Antarctica C94-079
Drag Reduction of Airplane Fuselages Through Shaping by the Inverse Method C94-037

Hypersonic Flow

Inverse Solutions of the Prandtl-Meyer Function C94-221
Ram Accelerator Ballistic Range Concept for Softly Accelerating Hypersonic Free-Flying Models C94-203
Waveriders with Finlets C94-173
Inviscid Parametric Analysis of Three-Dimensional Inlet Performance C94-090

Inlet, Nozzle, Diffuser, and Channel Flows

Flow Study of Supersonic Wing-Nacelle Configuration C94-222
Aircraft Thrust Vectoring Using Flexible Nonaxisymmetric Nozzles C94-144
Inlet Drag Prediction for Aircraft Conceptual Design C94-091
Inviscid Parametric Analysis of Three-Dimensional Inlet Performance C94-090

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Effect of Ground and Ceiling Planes on Shape of Energized Wakes **C94-190**
Application of Circulation Control to Advanced Subsonic Transport Aircraft, Part I: Airfoil Development **C94-177**
Experimental Investigation of Rotor/Lifting Surface Interactions **C94-122**
Side Force Augmentation at High Angle of Attack from Pneumatic Vortex Control **C94-118**
Interrupted Jet as a Candidate for Mixing Enhancement in Aircraft Ejectors **C94-117**
Jet Ground Vortex Formation by Annular Jets **C94-115**
Prediction Method for Unsteady Axisymmetric Flow over Parachutes **C94-094**
Reduction in Size and Unsteadiness of VTOL Ground Vortices by Ground Fences **C94-085**
Drag and Wake Modification of Axisymmetric Bluff Bodies Using Coanda Blowing **C94-084**
Boundary-Layer Influences on the Subsonic Near-Wake of Bluff Bodies **C94-058**
Prediction of Ice Shapes and Their Effect on Airfoil Drag **C94-035**
Computational Analysis of a Single Jet Impingement Ground Effect Lift Loss **C94-034**
Calculations of Hot Gas Ingestion for a STOVL Aircraft Model **C94-031**
Suppression of Flow-Induced Pressure Oscillations in Cavities **C94-011**
Experimental Study of Pneumatic Control of Forebody Vortices at High Alpha **C94-006**

Separated Flows

Pneumatic Concept for Tip-Stall Control of Cranked-Arrow Wings **C94-213**
Further Analysis of High-Rate Rolling Experiments of a 65-Deg Delta Wing **C94-209**
Separation Control on High-Lift Airfoils via Micro-Vortex Generators **C94-204**
Moving Wall Effect in Relation to Other Dynamic Stall Flow Mechanisms **C94-202**
Computation of the Poststall Behavior of a Circulation Controlled Airfoil **C94-198**
Vortical Flow Structure near the F/A-18 LEX at High Incidence **C94-187**
Comment on "Effect of Fuselage on Delta Wing Vortex Breakdown" **C94-152**
Side-Force Control on a Diamond Forebody at High Angles of Attack **C94-131**
Quantitative Study of Unsteady Compressible Flow on an Oscillating Airfoil **C94-128**
Low-Speed Characteristics for the Wing-Canard Configuration of the International Vortex Flow Experiment **C94-125**
Steady and Unsteady Pressure Distributions on an F/A-18 Wing at $\alpha = 30$ Deg **C94-124**
Locally Interactive Laminar Separation Bubble Model **C94-116**
Problem of Dynamic Stall Simulation Revisited **C94-113**
Physics of Coanda Jet Detachment at High-Pressure Ratio **C94-087**
Unsteady Aerodynamic Characteristics of a Dual-Element Airfoil **C94-078**
Unique High-Alpha Roll Dynamics of a Sharp-Edged 65-Deg Delta Wing **C94-076**
Effects of Nozzle Exit Geometry on Forebody Vortex Control Using Blowing **C94-074**
Boundary-Layer Influences on the Subsonic Near-Wake of Bluff Bodies **C94-058**

Shock Waves and Detonations

Effects of Nozzle Exit Geometry on Forebody Vortex Control Using Blowing **C94-074**

Subsonic Flow

Moving Wall Effect in Relation to Other Dynamic Stall Flow Mechanisms **C94-202**
Progress in High-Lift Aerodynamic Calculations **C94-193**
Two-Variable Method for Blockage Wall Interference in a Circular Tunnel **C94-172**
Comment on "Effect of Fuselage on Delta Wing Vortex Breakdown" **C94-152**
Forebody Tangential Slot Blowing on an Aircraft Geometry **C94-132**
Problem of Dynamic Stall Simulation Revisited **C94-113**
Computational Study of the F-5A Forebody Emphasizing Directional Stability **C94-072**
Chine-Shaped Forebody Effects on Directional Stability at High-alpha **C94-071**
Wake Curvature and Airfoil Lift **C94-067**
Aerodynamic Properties of Crescent Wing Planforms **C94-066**
Boundary-Layer Influences on the Subsonic Near-Wake of Bluff Bodies **C94-058**
Alleviation of Side Force on Tangent-Ogive Forebodies Using Passive Porosity **C94-046**
Method for the Prediction of Wing Maximum Lift **C94-013**

Supersonic Flow

Flow Study of Supersonic Wing-Nacelle Configuration **C94-222**
Inverse Solutions of the Prandtl-Meyer Function **C94-221**
Interpretation of Waverider Performance Data Using Computational Fluid Dynamics **C94-166**
Doublet-Point Method for Supersonic Unsteady Aerodynamics of Nonplanar Lifting-Surfaces **C94-108**
Computation of Supersonic Jet Mixing Noise for an Axisymmetric Convergent-Divergent Nozzle **C94-089**
Physics of Coanda Jet Detachment at High-Pressure Ratio **C94-087**
Control of Cavity Flow by Upstream Mass-Injection **C94-022**
Investigation of Three-Dimensional Separation at Wing/Body Junctions in Supersonic Flows **C94-008**
Sonic Boom Predictions Using a Solution-Adaptive Full-Potential Code **C94-007**

Transonic Flow

Unstructured Grid Solutions to a Wing/Pylon/Store Configuration **C94-200**
Limit Cycle Phenomena in Computational Transonic Aeroelasticity **C94-195**
Preliminary Assessment of Tunnel Wall Interference in the NDA Cryogenic Wind Tunnel **C94-163**
Aerodynamic Sensitivity Coefficients Using the Three-Dimensional Full Potential Equation **C94-162**
Effect of Sidewall Boundary Layer on Transonic Flow over a Wing **C94-145**
Turbulence Model Evaluation for Use with Supercritical Airfoils **C94-141**
Unstructured Mesh Quality Assessment and Upwind Euler Solution Algorithm Validation **C94-095**
Navier-Stokes Computations for Oscillating Control Surfaces **C94-093**
Pressure Measurements on a Forward-Swept Wing-Canard Configuration **C94-069**

Unsteady Flows

Further Analysis of High-Rate Rolling Experiments of a 65-Deg Delta Wing **C94-209**
Navier-Stokes Prediction of Large-Amplitude Delta-Wing Roll Oscillations **C94-207**
Moving Wall Effect in Relation to Other Dynamic Stall Flow Mechanisms **C94-202**
Computation of the Poststall Behavior of a Circulation Controlled Airfoil **C94-198**
Sidewash on the Vertical Tail in Subsonic and Supersonic Flows **C94-194**
Vortical Flow Structure near the F/A-18 LEX at High Incidence **C94-187**
Continuous Gust Response and Sensitivity Derivatives Using State-Space Models **C94-183**
Experimental Investigations on Limit Cycle Wing Rock of Slender Wings **C94-175**
Numerical Simulation of Steady and Unsteady, Vorticity-Dominated Aerodynamic Interference **C94-156**
Experimental Investigation of Vortex Breakdown over a Sideslipping Canard-Configured Aircraft Model **C94-150**
Study of Dynamic Stall Using Real-Time Interferometry **C94-147**
Unsteady Vortex Dynamics and Surface Pressure Topologies on a Finite Pitching Wing **C94-129**
Quantitative Study of Unsteady Compressible Flow on an Oscillating Airfoil **C94-128**
Steady and Unsteady Pressure Distributions on an F/A-18 Wing at $\alpha = 30$ Deg **C94-124**
Problem of Dynamic Stall Simulation Revisited **C94-113**
Turbulent Flow Structure Associated with Vortex-Induced Fin Buffeting **C94-112**
Doublet-Point Method for Supersonic Unsteady Aerodynamics of Nonplanar Lifting-Surfaces **C94-108**
Unsteady Blade Pressures on a Propfan: Predicted and Measured Compressibility Effects **C94-106**
Unstructured Mesh Quality Assessment and Upwind Euler Solution Algorithm Validation **C94-095**
Prediction Method for Unsteady Axisymmetric Flow over Parachutes **C94-094**
Navier-Stokes Computations for Oscillating Control Surfaces **C94-093**
Physics of Coanda Jet Detachment at High-Pressure Ratio **C94-087**
Unsteady Aerodynamic Characteristics of a Dual-Element Airfoil **C94-078**
Unique High-Alpha Roll Dynamics of a Sharp-Edged 65-Deg Delta Wing **C94-076**
Loading Characteristics of Finite Wings Undergoing Rapid Unsteady Motions: A Theoretical Treatment **C94-073**
Analysis of Aerodynamics of Airfoils Moving over a Wavy Wall **C94-050**
Unsteady Lift of a Flapped Airfoil by Indicial Concepts **C94-038**
Unsteady Vortex Structure over a Delta Wing **C94-032**
Characteristics of the Surface Pressures on a F/A-18 Vertical Fin Due to Buffet **C94-030**

Control of Cavity Flow by Upstream Mass-Injection C94-022
Measurement of Unsteady Airloads on an Oscillating Engine and a Wing/Engine Combination C94-012
Frequency-Domain Analysis of Fluctuating Pressure on a Pusher Propeller Blade Surface C94-005

Vortices

Effect of Leeward Flow Dividers on the Wing Rock of a Delta Wing C94-225
Pneumatic Concept for Tip-Stall Control of Cranked-Arrow Wings C94-213
Forebody Flow Control on a Full-Scale F/A-18 Aircraft C94-211
Further Analysis of High-Rate Rolling Experiments of a 65-Deg Delta Wing C94-209
Navier-Stokes Prediction of Large-Amplitude Delta-Wing Roll Oscillations C94-207
Experimental Investigation of the Flowfield About an Upswept Afterbody C94-199
Vortical Flow Structure near the F/A-18 LEX at High Incidence C94-187
Aerodynamic Characteristics of Strake Vortex Flaps on a Strake-Wing Configuration C94-169
Analysis of an Oscillating Joukowski Airfoil with Surface Suction and Moving Vortices C94-159
Numerical Simulation of Incidence and Sweep Effects on Delta Wing Vortex Breakdown C94-158
Numerical Simulation of Steady and Unsteady, Vorticity-Dominated Aerodynamic Interference C94-156
Comment on "Effect of Fuselage on Delta Wing Vortex Breakdown" C94-152
Effect of a Fuselage on Delta Wing Vortex Breakdown C94-152
Experimental Investigation of Vortex Breakdown over a Sideslipping Canard-Configured Aircraft Model C94-150
Simple Equations for Helical Vortex Wakes C94-148
Effect of Sidewall Boundary Layer on Transonic Flow over a Wing C94-145
Forebody Tangential Slot Blowing on an Aircraft Geometry C94-132
Side-Force Control on a Diamond Forebody at High Angles of Attack C94-131
Flowfield Study of a Close-Coupled Canard Configuration C94-130
Unsteady Vortex Dynamics and Surface Pressure Topologies on a Finite Pitching Wing C94-129
Low-Speed Characteristics for the Wing-Canard Configuration of the International Vortex Flow Experiment C94-125
Use of Artificial Neural Networks for Buffet Environments C94-120
Turbulent Flow Structure Associated with Vortex-Induced Fin Buffeting C94-112
Leading-Edge Vortex Breakdown for Wing Planforms with the Same Slenderness Ratio C94-101
Active Control of Wing Rock Using Tangential Leading-Edge Blowing C94-097
Prediction Method for Unsteady Axisymmetric Flow over Parachutes C94-094
Reduction in Size and Unsteadiness of VTOL Ground Vortices by Ground Fences C94-085
Unique High-Alpha Roll Dynamics of a Sharp-Edged 65-Deg Delta Wing C94-076
Effects of Nozzle Exit Geometry on Forebody Vortex Control Using Blowing C94-074
Aerodynamic Properties of Crescent Wing Planforms C94-066
Vortex-Wing Interaction of a Close-Coupled Canard Configuration C94-041
Forebody Vortex Control for Wing Rock Suppression C94-039
Unsteady Vortex Structure over a Delta Wing C94-032
Roll Moment Characteristics of Asymmetric Tangential Leading-Edge Blowing on a Delta Wing C94-021
Aerodynamics of Airfoils with Vortex Trapped by Two Spanwise Fences C94-019
Effect of Canard Deflection on Close-Coupled Canard-Wing-Body Aerodynamics C94-018

Guidance, Control, and Dynamics Technology

Aircraft Dynamics

Method for the Prediction of the Onset of Wing Rock C94-220
Development and Flight Test of a Deployable Precision Landing System C94-167
Prevention of Jump in Inertia-Coupled Roll Maneuvers of Aircraft C94-143
Direct Solution of the Aeroelastic Stability Equations C94-142
Measured and Theoretical Supersonic Dynamic Stability Characteristics of a National Aero-Space Plane Configuration C94-088
Significance of the Dihedral Effect in Rapid Fuselage-Reorientation Maneuvers C94-081
Fundamentals and Similarity Transformations of Vectored Aircraft C94-024
Application of Bifurcation Theory to the High-Angle-of-Attack Dynamics of the F-14 C94-003

Aircraft Guidance

Simulation and Flight Test Evaluation of Head-Up-Display Guidance for Harrier Approach Transitions C94-165
Design and Analysis of a Kalman Filter for Terrain-Referenced Positioning and Guidance C94-044

Aircraft Stability and Control

Method for the Prediction of the Onset of Wing Rock C94-220
Passive Porosity with Free and Fixed Separation on a Tangent-Ogive Forebody C94-186
Offset Thrust Axes and Pitch Stability C94-185
Waveriders with Finlets C94-173
Prevention of Jump in Inertia-Coupled Roll Maneuvers of Aircraft C94-143
Active Control of Wing Rock Using Tangential Leading-Edge Blowing C94-097
Preliminary Piloted Simulation Studies of the HL-20 Lifting Body C94-082
Evaluation of Parameter Estimation Methods for Unstable Aircraft C94-075
Parameter Estimates of an Aeroelastic Aircraft as Affected by Model Simplifications C94-062
Effects of Thrust Line Offset on Neutral Point Determination in Flight Testing C94-047
Alleviation of Side Force on Tangent-Ogive Forebodies Using Passive Porosity C94-046
Forebody Vortex Control for Wing Rock Suppression C94-039
Application of Bifurcation Theory to the High-Angle-of-Attack Dynamics of the F-14 C94-003
Comment on "Model Flight Tests and Neutral Point Determination" C92-133

Artificial Intelligence

Tree Lookahead in Air Combat C94-138
Use of Artificial Neural Networks for Buffet Environments C94-120

Avionics Systems

Design and Analysis of a Kalman Filter for Terrain-Referenced Positioning and Guidance C94-044

Control System Design

Preliminary Piloted Simulation Studies of the HL-20 Lifting Body C94-082

Control System Effectors

Active Control of Wing Rock Using Tangential Leading-Edge Blowing C94-097

Control System Sensors

Experiments on the Automatic Control of Boundary-Layer Transition C94-219

Differential Games

Tree Lookahead in Air Combat C94-138

Dynamics

Hunting Phenomena of the Balloon Motions Observed over Antarctica C94-079

Flight Displays

Pilot Weather Advisor System C94-192
Takeoff Performance Monitoring System Display Options C94-098

Flight Mechanics

Method for the Prediction of the Onset of Wing Rock C94-220
Prevention of Jump in Inertia-Coupled Roll Maneuvers of Aircraft C94-143
Significance of the Dihedral Effect in Rapid Fuselage-Reorientation Maneuvers C94-081
Analysis of Aerodynamics of Airfoils Moving over a Wavy Wall C94-050

Handling Qualities

Effects of Thrust Line Offset on Neutral Point Determination in Flight Testing C94-047

Missile Dynamics

Alleviation of Side Force on Tangent-Ogive Forebodies Using Passive Porosity C94-046
Design and Analysis of a Kalman Filter for Terrain-Referenced Positioning and Guidance C94-044

System Identification

Evaluation of Parameter Estimation Methods for Unstable Aircraft **C94-075**
Continuum Sizing Design Sensitivity Analysis of Eigenvectors Using Ritz Vectors **C94-064**
Parameter Estimates of an Aeroelastic Aircraft as Affected by Model Simplifications **C94-062**

Trajectory Optimization

Significance of the Dihedral Effect in Rapid Fuselage-Reorientation Maneuvers **C94-081**

Interdisciplinary Topics

Aerospace Technology Utilization

Scheduled Maintenance Optimization System **C94-065**

Analytical and Numerical Methods

Stratospheric Towed Vehicle Concept **C94-206**
Comparison of Electrostatic and Aerodynamic Forces During Parachute Opening **C94-164**
Aerodynamic Sensitivity Coefficients Using the Three-Dimensional Full Potential Equation **C94-162**
Bombardment Analysis Method for Assessing Truss System Combat Survivability **C94-055**
Supersonic Transport Wing Minimum Weight Design Integrating Aerodynamics and Structures **C94-043**

Atmospheric and Space Sciences

Preliminary Piloted Simulation Studies of the HL-20 Lifting Body **C94-082**
Development of an Improved Model for Runback Water on Aircraft Surfaces **C94-036**
Remote Sensing Observations of Winter Aircraft Icing Conditions: A Case Study **C94-010**

CAD/CAM

Scheduled Maintenance Optimization System **C94-065**

Lasers and Laser Applications

In-Flight Velocity Measurements Using Laser Doppler Anemometry **C94-059**

Reliability, Maintainability, and Logistics Support

Scheduled Maintenance Optimization System **C94-065**
Aircraft Fleet Maintenance Based on Structural Reliability Analysis **C94-054**

Research Facilities and Instrumentation

Ram Accelerator Ballistic Range Concept for Softly Accelerating Hypersonic Free-Flying Models **C94-203**
Flight Experience with Lightweight, Low-Power Miniaturized Instrumentation Systems **C94-154**
In-Flight Velocity Measurements Using Laser Doppler Anemometry **C94-059**

Safety

Bombardment Analysis Method for Assessing Truss System Combat Survivability **C94-055**
Aircraft Fleet Maintenance Based on Structural Reliability Analysis **C94-054**
Remote Sensing Observations of Winter Aircraft Icing Conditions: A Case Study **C94-010**

Launch Vehicle and Missile (LV/M) Technology

Structural Design (Including Loads)

Brief History of Gust Models for Aircraft Design **C94-189**

Propulsion

Airbreathing Propulsion

Aircraft Thrust Vectoring Using Flexible Nonaxisymmetric Nozzles **C94-144**
Inlet Drag Prediction for Aircraft Conceptual Design **C94-091**
Fundamentals and Similarity Transformations of Vectored Aircraft **C94-024**

Ramjets and Scramjets

Inviscid Parametric Analysis of Three-Dimensional Inlet Performance **C94-090**

Structural Mechanics and Materials

Aeroelasticity and Control

Static Aeroelastic Characteristics of a Composite Wing **C94-218**
Postinstability Behavior of a Two-Dimensional Airfoil with a Structural Nonlinearity **C94-215**
Limit Cycle Phenomena in Computational Transonic Aeroelasticity **C94-195**
Influence of Structural and Aerodynamic Modeling on Flutter Analysis **C94-182**
Using Adaptive Structures to Attenuate Rotary Wing Aeroelastic Response **C94-179**
Direct Solution of the Aeroelastic Stability Equations **C94-142**
Several Considerations Regarding the Variable Blade Length Rotor **C94-140**
Steady and Unsteady Pressure Distributions on an F/A-18 Wing at $\alpha = 30$ Deg **C94-124**
Comprehensive Model of Anisotropic Composite Aircraft Wings Suitable for Aeroelastic Analyses **C94-103**
Time Simulation of Flutter with Large Stiffness Changes **C94-052**
Modal Coordinates for Aeroelastic Analysis with Large Local Structural Variations **C94-051**
Characteristics of the Surface Pressures on a F/A-18 Vertical Fin Due to Buffet **C94-030**
Panel Flutter Suppression Using Adaptive Material Actuators **C94-028**
Integration of Structural Optimization in the General Design Process for Aircraft **C94-027**
Integrated Structure/Control Concepts for Oblique Wing Roll Control and Trim **C94-015**
Measurement of Unsteady Airloads on an Oscillating Engine and a Wing/Engine Combination **C94-012**

Dynamic Model Analysis

Dynamic Analysis of Bearingless Tail Rotor Blades Based on Nonlinear Shell Models **C94-216**
Effects of Model Scale on Flight Characteristics and Design Parameters **C94-063**
Time Simulation of Flutter with Large Stiffness Changes **C94-052**
Modal Coordinates for Aeroelastic Analysis with Large Local Structural Variations **C94-051**
Multidimensional Mount Effectiveness for Vibration Isolation **C94-025**

Flexible and Active Structures

Using Adaptive Structures to Attenuate Rotary Wing Aeroelastic Response **C94-179**
Radial Reefing Method for Accelerated and Controlled Parachute Opening **C94-171**

Materials Structural Properties

Fatigue Crack Propagation in Aerospace Aluminum Alloys **C94-105**

Structural Composite Materials

Nonlinear Angle of Twist of Advanced Composite Wing Boxes Under Pure Torsion **C94-201**
Buckling Analysis of Geodesically Stiffened Composite Panels with Discrete Stiffeners **C94-181**
Vibration Analysis of Heated Anisotropic Plates with Free Edge Conditions **C94-102**
Study of Structurally Efficient Graphite-Thermoplastic Trapezoidal-Corrugation Sandwich and Semisandwich Panels **C94-053**
Nonlinear Response and Sonic Fatigue of National Aerospace Space Plane Surface Panels **C94-001**

Structural Design

Nonlinear Angle of Twist of Advanced Composite Wing Boxes Under Pure Torsion **C94-201**
Buckling Analysis of Geodesically Stiffened Composite Panels with Discrete Stiffeners **C94-181**
Coupling Equivalent Plate and Finite Element Formulations in Multiple-Method Structural Analyses **C94-180**

Structural Durability (Including Fatigue, Fracture, and Environmental Degradation)

Fatigue Crack Propagation in Aerospace Aluminum Alloys **C94-105**
Determination of Tire-Wheel Interface Loads for Aircraft Wheels **C94-056**
Aircraft Fleet Maintenance Based on Structural Reliability Analysis **C94-054**

Structural Dynamics and Characterization

Dynamic Analysis of Bearingless Tail Rotor Blades Based on Nonlinear Shell Models **C94-216**
Postinstability Behavior of a Two-Dimensional Airfoil with a Structural Nonlinearity **C94-215**
Brief History of Gust Models for Aircraft Design **C94-189**
Influence of Structural and Aerodynamic Modeling on Flutter Analysis **C94-182**
Use of Artificial Neural Networks for Buffet Environments **C94-120**

Vibration Analysis of Heated Anisotropic Plates with Free Edge Conditions **C94-102**

Characteristics of the Surface Pressures on a F/A-18 Vertical Fin Due to Buffet **C94-030**

Nonlinear Response and Sonic Fatigue of National Aerospace Space Plane Surface Panels **C94-001**

Structural Finite Elements

Coupling Equivalent Plate and Finite Element Formulations in Multiple-Method Structural Analyses **C94-180**

Joined-Wing Model Vibrations Using PC-Based Modal Testing and Finite Element Analysis **C94-061**

Determination of Tire-Wheel Interface Loads for Aircraft Wheels **C94-056**

Structural Modeling

Influence of Structural and Aerodynamic Modeling on Flutter Analysis **C94-182**

Analytic Sensitivities for Shape Optimization in Equivalent Plate Structural Wing Models **C94-137**

Lessons from Application of Equivalent Plate Structural Modeling to an HSCT Wing **C94-136**

Survey and Comparison of Engineering Beam Theories for Helicopter Rotor Blades **C94-070**

Determination of Tire-Wheel Interface Loads for Aircraft Wheels **C94-056**

Multidimensional Mount Effectiveness for Vibration Isolation **C94-025**

Structural Optimization

Analytic Sensitivities for Shape Optimization in Equivalent Plate Structural Wing Models **C94-137**

Lessons from Application of Equivalent Plate Structural Modeling to an HSCT Wing **C94-136**

Continuum Sizing Design Sensitivity Analysis of Eigenvectors Using Ritz Vectors **C94-064**

Study of Structurally Efficient Graphite-Thermoplastic Trapezoidal-Corrugation Sandwich and Semisandwich Panels **C94-053**

Structural Stability

Buckling Analysis of Geodesically Stiffened Composite Panels with Discrete Stiffeners **C94-181**

Thermal Effects

Vibration Analysis of Heated Anisotropic Plates with Free Edge Conditions **C94-102**

Thermophysics and Heat Transfer

Computational Heat Transfer

Development of an Improved Model for Runback Water on Aircraft Surfaces **C94-036**

Chronological Index

C92-133 Model Flight Tests of a Spin-Resistant Trainer Configuration. Long P. Yip, Holly M. Ross, and David B. Robelen, *NASA Langley Research Center* (**29**, 5, p. 799) Article based on AIAA Paper 88-2146 CP885

Technical Comment by U. P. Solies, *University of Tennessee Space Institute* (**31**, 4, p. 1007)

C94-001 Nonlinear Response and Sonic Fatigue of National Aerospace Space Plane Surface Panels. Rimas Vaicaitis, *Columbia University* (**31**, 1, p. 10) Survey Paper

C94-002 Sonic Boom of the Oblique Flying Wing. A. Van der Velden, *Deutsche Airbus GmbH, Germany*; and I. Kroo, *Stanford University* (**31**, 1, p. 19) Article

C94-003 Application of Bifurcation Theory to the High-Angle-of-Attack Dynamics of the F-14. C. C. Jahnke, *Clarkson University*; and F. E. C. Culick, *California Institute of Technology* (**31**, 1, p. 26) Article

C94-004 Aerodynamic Design of Supersonic Cruise Wings with a Calibrated Linearized Theory. Michael J. Mann, *NASA Langley Research Center*; and Harry W. Carlson, *Lockheed Engineering and Sciences Company* (**31**, 1, p. 35) Article based on AIAA Paper 91-3302 CP918

C94-005 Frequency-Domain Analysis of Fluctuating Pressure on a Pusher Propeller Blade Surface. Saeed Farokhi, Ray Taghavi, and Kyle K. Wetzel, *University of Kansas* (**31**, 1, p. 42) Article

C94-006 Experimental Study of Pneumatic Control of Forebody Vortices at High Alpha. Kenneth C. Cornelius, and Noorulhaq Pandit, *Wright State University*; and Russel F. Osborn and Robert W. Guyton, *Wright Laboratory* (**31**, 1, p. 49) Article based on AIAA Paper 92-0018

C94-007 Sonic Boom Predictions Using a Solution-Adaptive Full-Potential Code. Michael D. Madson, *NASA Ames Research Center* (**31**, 1, p. 57) Article

C94-008 Investigation of Three-Dimensional Separation at Wing/Body Junctions in Supersonic Flows. B. Lakshmanan and S. N. Tiwari, *Old Dominion University* (**31**, 1, p. 64) Article

C94-009 Computational Study of Transition Front on a Swept Wing Leading-Edge Model. Venkit Iyer, *ViGYAN, Inc.*; Robert E. Spall, *University of South Alabama*; and J. Ray Dagenhart, *NASA Langley Research Center* (**31**, 1, p. 72) Article based on AIAA Paper 92-2630 CP926

C94-010 Remote Sensing Observations of Winter Aircraft Icing Conditions: A Case Study. B. B. Stankov and A. J. Bedard Jr., *NOAA/ERL/Wave Propagation Laboratory* (**31**, 1, p. 79) Article

C94-011 Suppression of Flow-Induced Pressure Oscillations in Cavities. R. L. Sarno and M. E. Franke, *Air Force Institute of Technology* (**31**, 1, p. 90) Article based on AIAA Paper 90-4018

C94-012 Measurement of Unsteady Airloads on an Oscillating Engine and a Wing/Engine Combination. H. Triebstein and G. Schewe, *DLR, German Aerospace Research Establishment, Germany*; and H. Zingel and S. Vogel, *Deutsche Airbus GmbH, Germany* (**31**, 1, p. 97) Article

C94-013 Method for the Prediction of Wing Maximum Lift. Walter O. Valarezo and Vincent D. Chin, *McDonnell Douglas Aerospace* (**31**, 1, p. 103) Article based on AIAA Paper 92-0401

C94-014 Variable-Complexity Aerodynamic Optimization of a High-Speed Civil Transport Wing. M. G. Hutchison, E. R. Unger, W. H. Mason, B. Grossman, and R. T. Haftka, *Virginia Polytechnic Institute and State University* (**31**, 1, p. 110) Article based on AIAA Paper 92-0212

C94-015 Integrated Structure/Control Concepts for Oblique Wing Roll Control and Trim. Terrence A. Weisshaar, *Purdue University* (**31**, 1, p. 117) Article

C94-016 Nonslender Waveriders. X. He and G. Emanuel, *University of Oklahoma* (**31**, 1, p. 125) Article

C94-017 Static and Dynamic Coefficients of a Cross-Type Parachute. Zalman Shpund and Daniel Levin, *Technion—Israel Institute of Technology* (**31**, 1, p. 132) Article

C94-018 Effect of Canard Deflection on Close-Coupled Canard-Wing-Body Aerodynamics. Eugene L. Tu, *NASA Ames Research Center* (**31**, 1, p. 138) Article based on AIAA Paper 92-2602 CP926

C94-019 Aerodynamics of Airfoils with Vortex Trapped by Two Spanwise Fences. Vernon J. Rossow, *NASA Ames Research Center* (**31**, 1, p. 146) Article based on AIAA Paper 91-3269 CP918

C94-020 Aircraft Spoiler Effects Under Wind Shear. M. M. Abdelrahman, M. A. Ghazi, I. A. Olwi, and A. M. Al-Bahi, *King Abdulaziz University, Saudi Arabia* (**31**, 1, p. 154) Article based on AIAA Paper 92-2642 CP926

C94-021 Roll Moment Characteristics of Asymmetric Tangential Leading-Edge Blowing on a Delta Wing. D. I. Greenwell and N. J. Wood, *University of Bath, England, UK* (**31**, 1, p. 161) Article based on AIAA Paper 93-0052

C94-022 Control of Cavity Flow by Upstream Mass-Injection. Ahmad D. Vakili and Christian Gauthier, *University of Tennessee Space Institute* (**31**, 1, p. 169) Article based on AIAA Paper 91-1645

C94-023 Effect of Wind-Tunnel Walls on Airfoil Droplet Impingement. Michael B. Bragg and Stephen L. Wells, *University of Illinois at Urbana–Champaign* (**31**, 1, p. 175) Article based on AIAA Paper 92-0642

C94-024 Fundamentals and Similarity Transformations of Vectored Aircraft. Benjamin Gal-Or, *Technion—Israel Institute of Technology* (**31**, 1, p. 181) Article

C94-025 Multidimensional Mount Effectiveness for Vibration Isolation. Douglas A. Swanson, Lane R. Miller, and Mark A. Norris, *Lord Corporation* (**31**, 1, p. 188) Article based on AIAA Paper 92-2381 CP922

C94-026 Simulation Model for Tail Rotor Failure. Matthew J. O'Rourke, *Lockheed Engineering and Sciences Company* (**31**, 1, p. 197) Article based on AIAA Paper 92-4633

C94-027 Integration of Structural Optimization in the General Design Process for Aircraft. O. Sensburg, J. Schweiger, H. Gödel, and A. Lotze, *Deutsche Aerospace, Germany* (**31**, 1, p. 206) Article

C94-028 Panel Flutter Suppression Using Adaptive Material

Actuators. R. C. Scott, *NASA Langley Research Center*; and T. A. Weisshaar, *Purdue University* (**31**, 1, p. 213) Article based on AIAA Paper 91-1067 CP911

C94-029 Active Sound Attenuation Across a Double Wall Structure. Ferdinand W. Grosveld, *Lockheed Engineering and Sciences Company*; and Kevin P. Shepherd, *NASA Langley Research Center* (**31**, 1, p. 223) Article based on AIAA Paper 91-0498

C94-030 Characteristics of the Surface Pressures on a F/A-18 Vertical Fin Due to Buffet. B. H. K. Lee and F. C. Tang, *Institute for Aerospace Research, Canada* (**31**, 1, p. 228) Article based on AIAA Paper 92-2127 CP923

C94-031 Calculations of Hot Gas Ingestion for a STOVL Aircraft Model. D. M. Fricker and J. D. Holdeman, *NASA Lewis Research Center*; and S. P. Vanka, *Universtiy of Illinois at Urbana–Champaign* (**31**, 1, p. 236) Article based on AIAA Paper 92-0385

C94-032 Unsteady Vortex Structure over a Delta Wing. Raymond E. Gordnier and Miguel R. Visbal, *U.S. Air Force Wright Laboratory* (**31**, 1, p. 243) Article

C94-033 Quantitative Low-Speed Wake Surveys. G. W. Brune, *Boeing Commercial Airplane Group* (**31**, 2, p. 249) Article

C94-034 Computational Analysis of a Single Jet Impingement Ground Effect Lift Loss. Xin Zhang, *Southampton University, England, UK*; and Dan N. Ing, *Logico Systems, Ltd., England, UK* (**31**, 2, p. 256) Article based on AIAA Paper 93-0869

C94-035 Prediction of Ice Shapes and Their Effect on Airfoil Drag. Jaiwon Shin, *NASA Lewis Research Center*; Brian Berkowitz, *Sverdrup Technology, Inc.*; and Hsun H. Chen and Tuncer Cebeci, *California State University* (**31**, 2, p. 263) Article based on AIAA Paper 91-0264

C94-036 Development of an Improved Model for Runback Water on Aircraft Surfaces. Kamel M. Al-Khalil, *National Research Council*; and Theo G. Keith Jr. and Kenneth J. De Witt, *University of Toledo* (**31**, 2, p. 271) Article based on AIAA Paper 92-0042

C94-037 Drag Reduction of Airplane Fuselages Through Shaping by the Inverse Method. M. F. Zedan, A. A. Seif, and S. Al-Moufadi, *King Saud University, Saudi Arabia* (**31**, 2, p. 279) Article

C94-038 Unsteady Lift of a Flapped Airfoil by Indicial Concepts. J. Gordon Leishman, *University of Maryland* (**31**, 2, p. 288) Article
Errata (**31**, 5, p. 1232)

C94-039 Forebody Vortex Control for Wing Rock Suppression. T. T. Ng, *University of Toledo*; and C. J. Suarez, B. R. Kramer, L. Y. Ong, B. Ayers, and G. N. Malcolm, *Eidetics International, Inc.* (**31**, 2, p. 298) Article

C94-040 Propulsion-Induced Aerodynamic Effects Measured with a Full-Scale STOVL Model. Brian E. Smith, *NASA Ames Research Center*; William A. Poppen, *General Dynamics*; and J. David Lye, *de Havilland Incorporated, Canada* (**31**, 2, p. 306) Article based on AIAA Paper 91-0765

C94-041 Vortex-Wing Interaction of a Close-Coupled Canard Configuration. Eugene L. Tu, *NASA Ames Research Center* (**31**, 2, p. 314) Article

C94-042 Experimental Studies of Vortex Flaps and Vortex Plates. K. Rinoie and J. L. Stollery, *Cranfield Institute of Technology, England, UK* (**31**, 2, p. 322) Article based on AIAA Paper 92-4101 CP9212

C94-043 Supersonic Transport Wing Minimum Weight Design Integrating Aerodynamics and Structures. J.-F. M. Barthelemy, *NASA Langley Research Center*; G. A. Wrenn and A. R. Dovi, *Lockheed Engineering and Sciences Company*; P. G. Coen, *NASA Langley Research Center*; and L. E. Hall, *Unisys Corporation* (**31**, 2, p. 330) Article based on AIAA Paper 92-2372 CP922

C94-044 Design and Analysis of a Kalman Filter for Terrain-Referenced Positioning and Guidance. Richard E. Zelenka, *NASA Ames Research Center* (**31**, 2, p. 339) Article based on AIAA Paper 92-4420 CP928

C94-045 Computational Analysis of Off-Design Waveriders. X. He and M. L. Rasmussen, *University of Oklahoma* (**31**, 2, p. 345) Article

C94-046 Alleviation of Side Force on Tangent-Ogive Forebodies Using Passive Porosity. Stephen X. S. Bauer, *NASA Langley Research Center*; and Michael J. Hemsch, *Lockheed Engineering and Sciences Company* (**31**, 2, p. 354) Article based on AIAA Paper 92-2711 CP926

C94-047 Effects of Thrust Line Offset on Neutral Point Determination in Flight Testing. U. P. Solies, *University of Tennessee Space Institute* (**31**, 2, p. 362) Article based on AIAA Paper 92-4082 CP9212

C94-048 Investigation of Monte Carlo Simulation in FAA Program KRASH. Howard J. Fleisher, *Galaxy Scientific Corporation*; and Haym Benaroya, *Rutgers University* (**31**, 2, p. 367) Article

C94-049 Aircraft Accident Flight Path Simulation and Animation. D. E. Calkins, *University of Washington* (**31**, 2, p. 376) Article based on AIAA Paper 91-0422

C94-050 Analysis of Aerodynamics of Airfoils Moving over a Wavy Wall. Kyoko Nitta, *Nagoya University, Japan* (**31**, 2, p. 387) Article

C94-051 Modal Coordinates for Aeroelastic Analysis with Large Local Structural Variations. M. Karpel, *Technion—Israel Institute of Technology*; and C. D. Wieseman, *NASA Langley Research Center* (**31**, 2, p. 396) Article

C94-052 Time Simulation of Flutter with Large Stiffness Changes. M. Karpel, *Technion—Israel Institute of Technology*; and C. D. Wieseman, *NASA Langley Research Center* (**31**, 2, p. 404) Article based on AIAA Paper 92-2394 CP922

C94-053 Study of Structurally Efficient Graphite-Thermoplastic Trapezoidal-Corrugation Sandwich and Semisandwich Panels. Dawn C. Jegley, *NASA Langley Research Center* (**31**, 2, p. 411) Article

C94-054 Aircraft Fleet Maintenance Based on Structural Reliability Analysis. J. N. Yang, *University of California, Irvine*; and S. D. Manning, *Lockheed/Fort Worth Company* (**31**, 2, p. 419) Article

C94-055 Bombardment Analysis Method for Assessing Truss System Combat Survivability. Hsing-Juin Lee, *National Chung-Hsing University, Taiwan, ROC* (**31**, 2, p. 426) Article

C94-056 Determination of Tire-Wheel Interface Loads for Aircraft Wheels. S. Kandarpa, B. F. Spencer Jr., and D. J. Kirkner, *University of Notre Dame*; and M. Champion, *Flight Dynamics*

Directorate (**31**, 2, p. 433) Article based on AIAA Paper 92-2482 CP922

C94-057 Buffet-Induced Structural/Flight-Control System Interaction of the X-29A Aircraft. David F. Voracek and Robert Clarke, *NASA Dryden Flight Research Facility* (**31**, 2, p. 441) Engineering Note based on AIAA Paper 91-1053 CP911

C94-058 Boundary-Layer Influences on the Subsonic Near-Wake of Bluff Bodies. Colin P. Britcher and Charles W. Alcorn, *Old Dominion University* (**31**, 2, p. 443) Engineering Note based on AIAA Paper 93-0525

C94-059 In-Flight Velocity Measurements Using Laser Doppler Anemometry. H. W. Jentink, *National Aerospace Laboratory, The Netherlands*; and M. Stieglmeier and C. Tropea, *University of Erlangen-Nürnberg, Germany* (**31**, 2, p. 444) Engineering Note

C94-060 Aircraft Landing Gear Positioning Concerning Abnormal Landing Cases. Hsing-Juin Lee, *National Chung-Hsing University, Taiwan, ROC*; and Cheng-Yi Chiou, *Chung Shan Institute of Science and Technology, Taiwan, ROC* (**31**, 2, p. 446) Engineering Note

C94-061 Joined-Wing Model Vibrations Using PC-Based Modal Testing and Finite Element Analysis. Benhe Qu and Malcolm A. Cutchins, *Auburn University* (**31**, 2, p. 449) Engineering Note based on AIAA Paper 92-2260 CP922

C94-062 Parameter Estimates of an Aeroelastic Aircraft as Affected by Model Simplifications. A. K. Ghosh and S. C. Raisinghani, *Indian Institute of Technology* (**31**, 2, p. 452) Engineering Note

C94-063 Effects of Model Scale on Flight Characteristics and Design Parameters. William H. Phillips, *NASA Langley Research Center* (**31**, 2, p. 454) Engineering Note

C94-064 Continuum Sizing Design Sensitivity Analysis of Eigenvectors Using Ritz Vectors. Semyung Wang and Kyung K. Choi, *University of Iowa* (**31**, 2, p. 457) Engineering Note based on AIAA Paper 91-1092 CP911

C94-065 Scheduled Maintenance Optimization System. Raymond J. Anderson, *McDonnell Douglas Corporation* (**31**, 2, p. 459) Engineering Note

C94-066 Aerodynamic Properties of Crescent Wing Planforms. P. L. Ardonceau, *Ecole Nationale Supérieure de Mécanique et d'Aérotechnique, France* (**31**, 2, p. 462) Engineering Note

C94-067 Wake Curvature and Airfoil Lift. Lucien Z. Dumitrescu, *Université de Provence, France* (**31**, 2, p. 465) Engineering Note

C94-068 Tail Load Calculations for Light Airplanes. E. V. Laitone, *University of California, Berkeley* (**31**, 2, p. 466) Engineering Note

C94-069 Pressure Measurements on a Forward-Swept Wing-Canard Configuration. Giovanni Lombardi, *University of Pisa, Italy*; and Mauro Morelli, *CSIR Laboratory, South Africa* (**31**, 2, p. 469) Engineering Note

C94-070 Survey and Comparison of Engineering Beam Theories for Helicopter Rotor Blades. Donald L. Kunz, *McDonnell Douglas Helicopter Company* (**31**, 3, p. 473) Survey Paper based on AIAA Paper 91-1194 CP911

C94-071 Chine-Shaped Forebody Effects on Directional Stability at High-α. R. Ravi and William H. Mason, *Virginia Polytechnic Institute and State University* (**31**, 3, p. 480) Article based on AIAA Paper 92-0030

C94-072 Computational Study of the F-5A Forebody Emphasizing Directional Stability. William H. Mason and R. Ravi, *Virginia Polytechnic Institute and State University* (**31**, 3, p. 488) Article based on AIAA Paper 91-3289 CP918

C94-073 Loading Characteristics of Finite Wings Undergoing Rapid Unsteady Motions: A Theoretical Treatment. Eric J. Jumper and Ronald J. Hugo, *University of Notre Dame* (**31**, 3, p. 495) Article based on AIAA Paper 91-3263 CP918

C94-074 Effects of Nozzle Exit Geometry on Forebody Vortex Control Using Blowing. Nathan M. Gittner and Ndaona Chokani, *North Carolina State University* (**31**, 3, p. 503) Article based on AIAA Paper 92-2306 CP922

C94-075 Evaluation of Parameter Estimation Methods for Unstable Aircraft. R. V. Jategaonkar, *DLR, German Aerospace Research Establishment*; and F. Thielecke, *Technical University of Brunswick, Germany* (**31**, 3, p. 510) Article

C94-076 Unique High-Alpha Roll Dynamics of a Sharp-Edged 65-Deg Delta Wing. L. E. Ericsson, *Lockheed Missiles & Space Company, Inc.*; and E. S. Hanff, *Institute for Aerospace Research, Canada* (**31**, 3, p. 520) Article based on AIAA Paper 92-0673

C94-077 Influence of Aerodynamic Forces in Ice Shedding. R. J. Scavuzzo, M. L. Chu, and V. Ananthaswamy, *University of Akron* (**31**, 3, p. 526) Article based on AIAA Paper 91-0664

C94-078 Unsteady Aerodynamic Characteristics of a Dual-Element Airfoil. Ismail H. Tuncer, *Naval Postgraduate School*; and Lakshmi N. Sankar, *Georgia Institute of Technology* (**31**, 3, p. 531) Article based on AIAA Paper 92-2508 CP922

C94-079 Hunting Phenomena of the Balloon Motions Observed over Antarctica. Jun Nishimura, *Kanagawa University, Japan* (**31**, 3, p. 538) Article based on AIAA Paper 91-3667

C94-080 Lift Enhancement of an Airfoil Using a Gurney Flap and Vortex Generators. Bruce L. Storms, *Sterling Software*; and Cory S. Jang, *California Polytechnic State University* (**31**, 3, p. 542) Article based on AIAA Paper 93-0647

C94-081 Significance of the Dihedral Effect in Rapid Fuselage-Reorientation Maneuvers. Spiro Bocvarov, Eugene M. Cliff, and Frederick H. Lutze, *Virginia Polytechnic Institute and State University* (**31**, 3, p. 548) Article based on AIAA Paper 92-4490 CP928

C94-082 Preliminary Piloted Simulation Studies of the HL-20 Lifting Body. Robert A. Rivers and E. Bruce Jackson, *NASA Langley Research Center*; and W. A. Ragsdale, *Unisys Corporation* (**31**, 3, p. 556) Article

C94-083 Calculation of Three-Dimensional Low Reynolds Number Flows. Tuncer Cebeci, Hsun H. Chen, and Beng P. Lee, *California State University, Long Beach* (**31**, 3, p. 564) Article based on AIAA Paper 91-0187

C94-084 Drag and Wake Modification of Axisymmetric Bluff Bodies Using Coanda Blowing. J. B. Freund and M. G. Mungal, *Stanford University* (**31**, 3, p. 572) Article based on AIAA Paper 92-2705 CP926

C94-085 Reduction in Size and Unsteadiness of VTOL Ground Vortices by Ground Fences. T. B. Harman, J. M. Cimbala, and M.

L. Billet, *Pennsylvania State University* (**31**, 3, p. 579) Article

C94-086 Wind-Tunnel Test Techniques for Unmanned Aerial Vehicle Separation Investigations. S. A. Moyer and M. D. Talbot, *Naval Air Warfare Center* (**31**, 3, p. 585) Article based on AIAA Paper 93-0626

C94-087 Physics of Coanda Jet Detachment at High-Pressure Ratio. Kenneth C. Cornelius and Gerald A. Lucius, *Wright State University* (**31**, 3, p. 591) Article

C94-088 Measured and Theoretical Supersonic Dynamic Stability Characteristics of a National Aero-Space Plane Configuration. David A. Dress, Richmond P. Boyden, and Christopher I. Cruz, *NASA Langley Research Center* (**31**, 3, p. 597) Article based on AIAA Paper 92-5009

C94-089 Computation of Supersonic Jet Mixing Noise for an Axisymmetric Convergent-Divergent Nozzle. Abbas Khavaran, *Sverdrup Technology, Inc.*; and Eugene A. Krejsa and Chan M. Kim, *NASA Lewis Research Center* (**31**, 3, p. 603) Article based on AIAA Paper 92-0500

C94-090 Inviscid Parametric Analysis of Three-Dimensional Inlet Performance. Scott D. Holland, *NASA Langley Research Center*; and John N. Perkins, *North Carolina State University* (**31**, 3, p. 610) Article based on AIAA Paper 92-3099

C94-091 Inlet Drag Prediction for Aircraft Conceptual Design. Paul Malan and Eugene F. Brown, *Virginia Polytechnic Institute and State University* (**31**, 3, p. 616) Article

C94-092 Computation of Three-Dimensional Hypersonic Flows in Chemical Nonequilibrium. S. Menne, C. Weiland, and M. Pfitzner, *Deutsche Aerospace A. G., Germany* (**31**, 3, p. 623) Article based on AIAA Paper 92-2876

C94-093 Navier-Stokes Computations for Oscillating Control Surfaces. Shigeru Obayashi and Guru P. Guruswamy, *NASA Ames Research Center* (**31**, 3, p. 631) Article based on AIAA Paper 92-4431 CP9210

C94-094 Prediction Method for Unsteady Axisymmetric Flow over Parachutes. J. H. Strickland, *Sandia National Laboratories* (**31**, 3, p. 637) Article based on AIAA Paper 93-1217

C94-095 Unstructured Mesh Quality Assessment and Upwind Euler Solution Algorithm Validation. Paul R. Woodard, *Purdue University*; John T. Batina, *NASA Langley Research Center*; and Henry T. Y. Yang, *Purdue University* (**31**, 3, p. 644) Article based on AIAA Paper 92-0444

C94-096 Two-Dimensional Euler Zonal Method Using Composite Structured and Unstructured Meshes. H. Hefazi and V. Chin, *California State University, Long Beach*; and L. T. Chen, *Douglas Aircraft Company* (**31**, 3, p. 651) Article based on AIAA Paper 90-3050 CP908

C94-097 Active Control of Wing Rock Using Tangential Leading-Edge Blowing. G. S. Wong, S. M. Rock, N. J. Wood, and L. Roberts, *Stanford University* (**31**, 3, p. 659) Article based on AIAA Paper 93-0056

C94-098 Takeoff Performance Monitoring System Display Options. David B. Middleton and Lee H. Person Jr., *NASA Langley Research Center*; and Raghavachari Srivatsan, *ViGYAN, Inc.* (**31**, 3, p. 666) Article

C94-099 Numerical Investigations on Two-Dimensional Canard-Wing Aerodynamic Interference. San-Yih Lin, Yan-Shin Chin, and Yuh-Ying Wang, *Institute of Aeronautics and Astronautics, Taiwan, ROC* (**31**, 3, p. 672) Article based on AIAA Paper 93-0639

C94-100 Design of Optimized Airfoils in Subcritical Flow. J. Olejniczak and A. S. Lyrintzis, *University of Minnesota* (**31**, 3, p. 680) Article based on AIAA Paper 93-0532

C94-101 Leading-Edge Vortex Breakdown for Wing Planforms with the Same Slenderness Ratio. William A. Straka, *George Washington University*; and Michael J. Hemsch, *Lockheed Engineering & Sciences Company* (**31**, 3, p. 688) Article

C94-102 Vibration Analysis of Heated Anisotropic Plates with Free Edge Conditions. James E. Locke, *University of Kansas* (**31**, 3, p. 696) Article

C94-103 Comprehensive Model of Anisotropic Composite Aircraft Wings Suitable for Aeroelastic Analyses. G. Karpouzian, *U.S. Naval Academy*; and L. Librescu, *Virginia Polytechnic Institute and State University* (**31**, 3, p. 703) Article based on AIAA Paper 91-0934 CP911

C94-104 Whirl-Flutter Suppression in Advanced Turboprops and Propfans by Active Control Techniques. F. Nitzsche, *DLR, German Aerospace Research Establishment, Germany* (**31**, 3, p. 713) Article

C94-105 Fatigue Crack Propagation in Aerospace Aluminum Alloys. Richard P. Gangloff, *University of Virginia*; and Robert S. Piascik, Dennis L. Dicus, and James C. Newman Jr., *NASA Langley Research Center* (**31**, 3, p. 720) Article

C94-106 Unsteady Blade Pressures on a Propfan: Predicted and Measured Compressibility Effects. M. Nallasamy, *Sverdrup Technology, Inc.* (**31**, 3, p. 730) Article based on AIAA Paper 92-3774

C94-107 Hover Acoustic Characteristics of the XV-15 with Advanced Technology Blades. David A. Conner, *NASA Langley Research Center*; and J. Brent Wellman, *NASA Ames Research Center* (**31**, 4, p. 737) Article

C94-108 Doublet-Point Method for Supersonic Unsteady Aerodynamics of Nonplanar Lifting-Surfaces. Ashish Tewari, *Indian Institute of Technology* (**31**, 4, p. 745) Article based on AIAA Paper 93-1588 CP931

C94-109 Severe Turbulence and Maneuvering from Airline Flight Records. R. C. Wingrove and R. E. Bach Jr., *NASA Ames Research Center* (**31**, 4, p. 753) Article based on AIAA Paper 92-4341 CP929

C94-110 Separation Bubble Model for Low Reynolds Number Airfoil Applications. Y. K. Shum and D. J. Marsden, *University of Alberta, Canada* (**31**, 4, p. 761) Article

C94-111 Tailoring Stall Characteristics Using Leading-Edge Droop Modifications. Holly M. Ross, *NASA Langley Research Center*; and John N. Perkins, *North Carolina State University* (**31**, 4, p. 767) Article

C94-112 Turbulent Flow Structure Associated with Vortex-Induced Fin Buffeting. Christian Breitsamter and Boris Laschka, *Technische Universität München, Germany* (**31**, 4, p. 773) Article

C94-113 Problem of Dynamic Stall Simulation Revisited. Lars E. Ericsson (**31**, 4, p. 782) Article based on AIAA Paper 93-0091

C94-114 Airfoil Shaping for Reduced Radar Cross Section.

Hoang Vinh, C. P. van Dam, and Harry A. Dwyer, *University of California, Davis* (**31**, 4, p. 787) Article

C94-115 **Jet Ground Vortex Formation by Annular Jets.** John M. Kuhlman and William M. Cavage, *West Virginia University* (**31**, 4, p. 794) Article based on AIAA Paper 92-4251

C94-116 **Locally Interactive Laminar Separation Bubble Model.** Paolo Dini, *Carleton College*; and Mark D. Maughmer, *Pennsylvania State University* (**31**, 4, p. 802) Article

C94-117 **Interrupted Jet as a Candidate for Mixing Enhancement in Aircraft Ejectors.** W. R. Quinn, *St. Francis Xavier University, Canada* (**31**, 4, p. 811) Article

C94-118 **Side Force Augmentation at High Angle of Attack from Pneumatic Vortex Control.** Kenneth C. Cornelius and Gerald A. Lucius, *Wright State University* (**31**, 4, p. 818) Article based on AIAA Paper 93-2959

C94-119 **Pilot Evaluations of Augmented Flight Simulator Motion.** Stuart T. Garrood and Lloyd D. Reid, *Univiersity of Toronto Institute for Aerospace Studies, Canada* (**31**, 4, p. 826) Article

C94-120 **Use of Artificial Neural Networks for Buffet Environments.** J. H. Jacobs, C. E. Hedgecock, P. F. Lichtenwalner, and L. E. Pado, *McDonnell Douglas Aerospace*; and A. E. Washburn, *ViGYAN, Inc.* (**31**, 4, p. 831) Article

C94-121 **Helicopter Rotor Lift Distributions for Minimum-Induced Power Loss.** Steven R. Hall and Kyle Y. Yang, *Massachusetts Institute of Technology*; and Kenneth C. Hall, *Duke University* (**31**, 4, p. 837) Article

C94-122 **Experimental Investigation of Rotor/Lifting Surface Interactions.** J. G. Leishman, *University of Maryland*; and Nai-Pei Bi, *Advanced Technologies, Inc.* (**31**, 4, p. 846) Article based on AIAA Paper 93-0871

C94-123 **Prediction of Ice Accretion with Viscous Effects on Aircraft Wings.** I. Paraschivoiu, P. Tran, and M. T. Brahimi, *Ecole Polytechnique de Montréal, Canada* (**31**, 4, p. 855) Article based on AIAA Paper 93-0027

C94-124 **Steady and Unsteady Pressure Distributions on an F/A-18 Wing at $\alpha = 30$ Deg.** B. H. K. Lee, N. R. Valerio, and F. C. Tang, *Institute for Aerospace Research, National Research Council, Canada* (**31**, 4, p. 862) Article based on AIAA Paper 93-3468

C94-125 **Low-Speed Characteristics for the Wing-Canard Configuration of the International Vortex Flow Experiment.** D. Hummel, *Institut für Strömungsmechanik, Germany*; and H.-Chr. Oelker, *Dornier Luftfahrt GmbH, Germany* (**31**, 4, p. 868) Article

C94-126 **Subsonic Static and Dynamic Stability Characteristics of a NASP Configuration.** Richmond P. Boyden, David A. Dress, Charles H. Fox Jr., Jarrett K. Huffman, and Christopher I. Cruz, *NASA Langley Research Center* (**31**, 4, p. 879) Article based on AIAA Paper 93-0519

C94-127 **Time-Accurate Computational Fluid Dynamics Approach to Transonic Store Separation Trajectory Prediction.** Lawrence E. Lijewski, *Wright Laboratory*; and Norman E. Suhs, *Calspan Corporation* (**31**, 4, p. 886) Article based on AIAA Paper 92-4569 CP928

C94-128 **Quantitative Study of Unsteady Compressible Flow on an Oscillating Airfoil.** L. W. Carr, *NASA Ames Research Center*; M. S. Chandrasekhara, *Naval Postgraduate School*; and N. J. Brock, *Aerometrics* (**31**, 4, p. 892) Article based on AIAA Paper 91-1683

C94-129 **Unsteady Vortex Dynamics and Surface Pressure Topologies on a Finite Pitching Wing.** Scott J. Schreck and Hank E. Helin, *U.S. Air Force Academy* (**31**, 4, p. 899) Article based on AIAA Paper 93-0435

C94-130 **Flowfield Study of a Close-Coupled Canard Configuration.** Richard M. Howard and John F. O'Leary, *Naval Postgraduate School* (**31**, 4, p. 908) Article based on AIAA Paper 93-3499 CP935

C94-131 **Side-Force Control on a Diamond Forebody at High Angles of Attack.** Dhanvada M. Rao and Gautam Sharma, *ViGYAN, Inc.* (**31**, 4, p. 915) Article based on AIAA Paper 93-3407 CP935

C94-132 **Forebody Tangential Slot Blowing on an Aircraft Geometry.** Ken Gee, *MCAT Institute*; and Yehia M. Rizk and Lewis B. Schiff, *NASA Ames Research Center* (**31**, 4, p. 922) Article based on AIAA Paper 93-2962

C94-133 **Identification of Helicopter Component Loads Using Multiple Regression.** David J. Haas and Robin Imber, *David Taylor Model Basin* (**31**, 4, p. 929) Article based on AIAA Paper 92-2110 CP923

C94-134 **Parametric Studies of Bearing Strength for Fiber/Metal Laminates.** H. Felix Wu, *Alcoa Technical Center*; and Wim J. Slagter, *Delft University of Technology, The Netherlands* (**31**, 4, p. 936) Article

C94-135 **Flight Loads Test of the Indigenous Defensive Fighter.** Yuan-Bin Chang, Tzer-Yuaan Lin, Jee-Ray Wang, and Chih-Chung Chen, *Aeronautical Research Laboratory, Taiwan, ROC* (**31**, 4, p. 946) Article

C94-136 **Lessons from Application of Equivalent Plate Structural Modeling to an HSCT Wing.** Eli Livne, *University of Washington*; and Robert A. Sels and Kumar G. Bhatia, *Boeing Commercial Airplane Group* (**31**, 4, p. 953) Article based on AIAA Paper 93-1413 CP931

C94-137 **Analytic Sensitivities for Shape Optimization in Equivalent Plate Structural Wing Models.** Eli Livne, *University of Washington* (**31**, 4, p. 961) Article

C94-138 **Tree Lookahead in Air Combat.** Amnon Katz, *University of Alabama* (**31**, 4, p. 970) Engineering Note

C94-139 **Nonlinear Flutter Analysis of Wings at High Angle of Attack.** Zheng-yin Ye and Ling-ching Zhao, *Northwestern Polytechnical University, PRC* (**31**, 4, p. 973) Engineering Note

C94-140 **Several Considerations Regarding the Variable Blade Length Rotor.** Bogdan Popescu and Victor Giurgiutiu, *Institute for Theoretical and Experimental Analysis of Aeronautical Structures, Romania* (**31**, 4, p. 975) Engineering Note

C94-141 **Turbulence Model Evaluation for Use with Supercritical Airfoils.** W. Kelly Londenberg, *ViGYAN, Inc.* (**31**, 4, p. 977) Engineering Note based on AIAA Paper 93-0191

C94-142 **Direct Solution of the Aeroelastic Stability Equations.** Maher N. Bismarck-Nasr, *Instituto Tecnológico de Aeronáutica, Brazil* (**31**, 4, p. 979) Engineering Note

C94-143 **Prevention of Jump in Inertia-Coupled Roll Maneuvers of Aircraft.** N. Ananthkrishnan and K. Sudhakar, *Indian*

Institute of Technology (**31**, 4, p. 981) Engineering Note

C94-144 Aircraft Thrust Vectoring Using Flexible Nonaxisymmetric Nozzles. Kevin W. Whitaker and Noshir S. Gowadia, *University of Alabama* (**31**, 4, p. 984) Engineering Note

C94-145 Effect of Sidewall Boundary Layer on Transonic Flow over a Wing. William E. Milholen II and Ndaona Chokani, *North Carolina State University* (**31**, 4, p. 986) Engineering Note based on AIAA Paper 92-4036

C94-146 Experimental Investigation of Vortex Flaps on Thick Delta Wings. D. Levin and A. Seginer, *Technion—Israel Institute of Technology* (**31**, 4, p. 988) Engineering Note

C94-147 Study of Dynamic Stall Using Real-Time Interferometry. L. W. Carr, *U.S. Army ATCOM and NASA Ames Research Center*; M. S. Chandrasekhara, *Naval Postgraduate School*; S. Ahmed, *MCAT Institute*; and N. J. Brock, *Aerometrics* (**31**, 4, p. 991) Engineering Note based on AIAA Paper 91-0007

C94-148 Simple Equations for Helical Vortex Wakes. D. H. Wood, *University of Newcastle, Australia* (**31**, 4, p. 994) Engineering Note

C94-149 Numerical Method for Estimation of Propeller Efficiencies. U. P. Solies, *University of Tennessee Space Institute* (**31**, 4, p. 996) Engineering Note

C94-150 Experimental Investigation of Vortex Breakdown over a Sideslipping Canard-Configured Aircraft Model. Sheshagiri K. Hebbar and Max F. Platzer, *Naval Postgraduate School*; and Chang Ho Kim, *Korean Air Force* (**31**, 4, p. 998) Engineering Note

C94-151 Comparing Aircraft Agility Using Mahalanobis Distances. John R. Howell; and Norman E. Howell, *Edwards Air Force Base* (**31**, 4, p. 1001) Engineering Note

C94-152 Effect of a Fuselage on Delta Wing Vortex Breakdown. William A. Straka, *George Washington University*; and Michael J. Hemsch, *Lockheed Engineering and Sciences Company* (**31**, 4, p. 1002) Engineering Note
Technical Comment by Lars E. Ericsson (**31**, 4, p. 1006)

C94-153 Recent Studies of Rotorcraft Blade-Vortex Interaction Noise. J. S. Preisser, T. F. Brooks, and R. M. Martin, *NASA Langley Research Center* (**31**, 5, p. 1009) Article

C94-154 Flight Experience with Lightweight, Low-Power Miniaturized Instrumentation Systems. Philip J. Hamory and James E. Murray, *NASA Dryden Flight Research Facility* (**31**, 5, p. 1016) Article based on AIAA Paper 92-4111

C94-155 Investigations of Propulsion Integration Interference Effects on a Transport Aircraft Configuration. C.-C. Rossow, *DLR, German Aerospace Research Establishment*; J.-L. Godard, *ONERA, France*; H. Hoheisel, *DLR, German Aerospace Research Establishment*; and V. Schmitt, *ONERA, France* (**31**, 5, p. 1022) Article based on AIAA Paper 92-3097

C94-156 Numerical Simulation of Steady and Unsteady, Vorticity-Dominated Aerodynamic Interference. Jamal M. Elzebda, Dean T. Mook, and Ali H. Nayfeh, *Virginia Polytechnic Institute and State University* (**31**, 5, p. 1031) Article

C94-157 Flight Control System Mode Transitions Influence on Handling Qualities and Task Performance. Lloyd D. Reid, Pavan Rajagopal, and Wolf O. Graf, *University of Toronto, Canada* (**31**, 5, p. 1037) Article

C94-158 Numerical Simulation of Incidence and Sweep Effects on Delta Wing Vortex Breakdown. J. A. Ekaterinaris and Lewis B. Schiff, *NASA Ames Research Center* (**31**, 5, p. 1043) Article based on AIAA Paper 90-3000 CP908

C94-159 Analysis of an Oscillating Joukowski Airfoil with Surface Suction and Moving Vortices. Chyn-Shan Chiu, *China Junior College of Technology, Taiwan, ROC* (**31**, 5, p. 1050) Article

C94-160 Repeatability of Ice Shapes in the NASA Lewis Icing Research Tunnel. Jaiwon Shin and Thomas H. Bond, *NASA Lewis Research Center* (**31**, 5, p. 1057) Article based on AIAA Paper 92-0647

C94-161 Model Ducted Propulsor Noise Characteristics at Takeoff Conditions. Richard P. Woodward, *NASA Lewis Research Center*; Lawrence A. Bock, *Pratt & Whitney*; Laurence J. Heidelberg, *NASA Lewis Reseach Center*; and David G. Hall, *NYMA Technology, Inc.* (**31**, 5, p. 1064) Article

C94-162 Aerodynamic Sensitivity Coefficients Using the Three-Dimensional Full Potential Equation. Hesham M. Elbanna and Leland A. Carlson, *Texas A&M University* (**31**, 5, p. 1071) Article based on AIAA Paper 92-2670 CP926

C94-163 Preliminary Assessment of Tunnel Wall Interference in the NDA Cryogenic Wind Tunnel. Yutaka Yamaguchi, Masahiro Yorozu, Tadashi Sakaue, and Teruo Saito, *National Defense Academy, Japan* (**31**, 5, p. 1078) Article based on AIAA Paper 93-0421

C94-164 Comparison of Electrostatic and Aerodynamic Forces During Parachute Opening. M. Horenstein, *Boston University*; and N. Roberts, *U.S. Army Natick Research, Development, and Engineering Center* (**31**, 5, p. 1084) Article

C94-165 Simulation and Flight Test Evaluation of Head-Up-Display Guidance for Harrier Approach Transitions. D. W. Dorr, E. Moralez III, and V. K. Merrick, *NASA Ames Research Center* (**31**, 5, p. 1089) Article based on AIAA Paper 92-4233

C94-166 Interpretation of Waverider Performance Data Using Computational Fluid Dynamics. Charles E. Cockrell Jr., *NASA Langley Research Center* (**31**, 5, p. 1095) Article based on AIAA Paper 93-2921

C94-167 Development and Flight Test of a Deployable Precision Landing System. Alex G. Sim, James E. Murray, and David C. Neufeld, *NASA Dryden Flight Research Facility*; and R. Dale Reed, *PRC, Inc.* (**31**, 5, p. 1101) Article based on AIAA Paper 94-2141

C94-168 State-Space Representation of Aerodynamic Characteristics of an Aircraft at High Angles of Attack. M. Goman and A. Khrabrov, *Central Aerohydrodynamic Institute, Russia* (**31**, 5, p. 1109) Article

C94-169 Aerodynamic Characteristics of Strake Vortex Flaps on a Strake-Wing Configuration. Lance W. Traub and Juan van der Merwe, *University of the Witwatersrand, South Africa* (**31**, 5, p. 1116) Article

C94-170 Selecting and Management of Fire Fighter Aircraft. L. Balis Crema, A. Castellani, and S. Guarniera, *University of Rome "La Sapienza," Italy* (**31**, 5, p. 1121) Article

C94-171 Radial Reefing Method for Accelerated and Controlled Parachute Opening. Calvin K. Lee, *U.S. Army Natick Research, Development, and Engineering Center* (**31**, 5, p. 1124) Article based on AIAA Paper 93-1209

C94-172 Two-Variable Method for Blockage Wall Interference in a Circular Tunnel. X. Qian and C. F. Lo, *University of Tennessee Space Institute* (**31**, 5, p. 1130) Article

C94-173 Waveriders with Finlets. X. He, M. L. Rasmussen, and R. A. Cox, *University of Oklahoma* (**31**, 5, p. 1135) Article based on AIAA Paper 93-3442 CP935

C94-174 Two-Point Transonic Airfoil Design Using Optimization for Improved Off-Design Performance. J. O. Hager, S. Eyi, and K. D. Lee, *University of Illinois at Urbana–Champaign* (**31**, 5, p. 1143) Article based on AIAA Paper 92-4225

C94-175 Experimental Investigations on Limit Cycle Wing Rock of Slender Wings. Andrew S. Arena Jr., *Oklahoma State University*; and Robert C. Nelson, *University of Notre Dame* (**31**, 5, p. 1148) Article

C94-176 Aerodynamic Effects of Delta Planform Tip Sails on Wing Performance. Lance W. Traub, *University of the Witwatersrand, South Africa* (**31**, 5, p. 1156) Article

C94-177 Application of Circulation Control to Advanced Subsonic Transport Aircraft, Part I: Airfoil Development. Robert J. Englar, Marilyn J. Smith, Sean M. Kelley, and Richard C. Rover III, *Georgia Tech Research Institute* (**31**, 5, p. 1160) Article based on AIAA Paper 93-0644

C94-178 Application of Circulation Control to Advanced Subsonic Transport Aircraft, Part II: Transport Application. Robert J. Englar, Marilyn J. Smith, Sean M. Kelley, and Richard C. Rover III, *Georgia Tech Research Institute* (**31**, 5, p. 1169) Article based on AIAA Paper 93-0644

C94-179 Using Adaptive Structures to Attenuate Rotary Wing Aeroelastic Response. Fred Nitzsche and Elmar J. Breitbach, *DLR, German Aerospace Research Establishment* (**31**, 5, p. 1178) Article based on AIAA Paper 92-2452 CP922

C94-180 Coupling Equivalent Plate and Finite Element Formulations in Multiple-Method Structural Analyses. Gary L. Giles and Keith Norwood, *NASA Langley Research Center* (**31**, 5, p. 1189) Article

C94-181 Buckling Analysis of Geodesically Stiffened Composite Panels with Discrete Stiffeners. Zafer Gürdal and Bruno Grall, *Virginia Polytechnic Institute and State University* (**31**, 5, p. 1197) Article

C94-182 Influence of Structural and Aerodynamic Modeling on Flutter Analysis. Alfred G. Striz, *University of Oklahoma*; and Vipperla B. Venkayya, *Wright Laboratories* (**31**, 5, p. 1205) Article based on AIAA Paper 90-0954 CP902

C94-183 Continuous Gust Response and Sensitivity Derivatives Using State-Space Models. Arie Zole and Mordechay Karpel, *Technion—Israel Institute of Technology* (**31**, 5, p. 1212) Engineering Note

C94-184 Interference Between Tanker Wing Wake with Roll-Up and Receiver Aircraft. A. W. Bloy and M. G. West, *University of Manchester, England, UK* (**31**, 5, p. 1214) Engineering Note

C94-185 Offset Thrust Axes and Pitch Stability. U. P. Solies, *University of Tennessee Space Institute* (**31**, 5, p. 1217) Engineering Note

C94-186 Passive Porosity with Free and Fixed Separation on a Tangent-Ogive Forebody. Richard M. Wood, Daniel W. Banks, and Steven X. S. Bauer, *NASA Langley Research Center* (**31**, 5, p. 1219) Engineering Note based on AIAA Paper 92-4494 CP929

C94-187 Vortical Flow Structure near the F/A-18 LEX at High Incidence. B. H. K. Lee and N. R. Valerio, *Institute for Aerospace Research, Canada* (**31**, 5, p. 1221) Engineering Note

C94-188 Minimum Sink-Speed in Power-Off Glide. Edmund V. Laitone, *University of California, Berkeley* (**31**, 5, p. 1223) Engineering Note

C94-189 Brief History of Gust Models for Aircraft Design. Hubert I. Flomenhoft (**31**, 5, p. 1225) Engineering Note

C94-190 Effect of Ground and Ceiling Planes on Shape of Energized Wakes. Vernon J. Rossow, *NASA Ames Research Center* (**31**, 5, p. 1227) Engineering Note based on AIAA Paper 93-3410 CP935

C94-191 Flow Visualization Studies on Sidewall Effects in Two-Dimensional Transonic Airfoil Testing. Norikazu Sudani, Mamoru Sato, Hiroshi Kanda, and Kenichi Matsuno, *National Aerospace Laboratory, Japan* (**31**, 6, p. 1233) Article

C94-192 Pilot Weather Advisor System. Shashi Seth, *ViGYAN, Inc.*; and Norman L. Crabill, *Aero Space Consultants* (**31**, 6, p. 1240) Article based on AIAA Paper 93-4002

C94-193 Progress in High-Lift Aerodynamic Calculations. Stuart E. Rogers, *NASA Ames Research Center* (**31**, 6, p. 1244) Article based on AIAA Paper 93-0194

C94-194 Sidewash on the Vertical Tail in Subsonic and Supersonic Flows. Chyn-shan Chiu, *China Junior College of Technology, Taiwan, ROC*; and I. J. Lin, *Chung Shan Institute of Science and Technology, Taiwan, ROC* (**31**, 6, p. 1252) Article

C94-195 Limit Cycle Phenomena in Computational Transonic Aeroelasticity. Kenneth A. Kousen, *United Technologies Research Center*; and Oddvar O. Bendiksen, *University of California, Los Angeles* (**31**, 6, p. 1257) Article based on AIAA Paper 89-1185 CP891

C94-196 Polar Patrol Balloon. Jun Nishimura, Nobuyuki Yajima, and Hiromitsu Akiyama, *Institute of Space and Astronautical Science, Japan*; Masaki Ejiri and Ryoichi Fujii, *National Institute of Polar Research, Japan*; and S. Kokubun, *University of Tokyo, Japan* (**31**, 6, p. 1264) Article based on AIAA Paper 91-3688

C94-197 Design Constraints in the Payload-Range Diagram of Ultrahigh Capacity Transport Airplanes. Rodrigo Martinez-Val, Emilio Perez, Tomas Muñoz, and Cristina Cuerno, *Universidad Politecnica de Madrid, Spain* (**31**, 6, p. 1268) Article based on AIAA Paper 93-3951

C94-198 Computation of the Poststall Behavior of a Circulation Controlled Airfoil. Samuel W. Linton, *Sterling Software at NASA Ames Research Center* (**31**, 6, p. 1273) Article based on AIAA Paper 93-0207

C94-199 Experimental Investigation of the Flowfield About an Upswept Afterbody. Ronald J. Epstein, Mario C. Carbonaro, and F. Caudron, *von Kármán Institute for Fluid Dynamics, Belgium* (**31**, 6, p. 1281) Article

C94-200 Unstructured Grid Solutions to a Wing/Pylon/Store Configuration. Paresh Parikh and Shahyar Pirzadeh, *ViGYAN, Inc.*; and Neal T. Frink, *NASA Langley Research Center* (**31**, 6, p. 1291) Article

C94-201 Nonlinear Angle of Twist of Advanced Composite

Wing Boxes Under Pure Torsion. Giulio Romeo, Giacomo Frulla, and Mario Busto, *Politecnico Di Torino, Italy* (**31**, 6, p. 1297) Article

C94-202 Moving Wall Effect in Relation to Other Dynamic Stall Flow Mechanisms. Lars E. Ericsson (**31**, 6, p. 1303) Article

C94-203 Ram Accelerator Ballistic Range Concept for Softly Accelerating Hypersonic Free-Flying Models. K. Wieland Naumann, *French-German Research Institute, France*; and Adam P. Bruckner, *University of Washington* (**31**, 6, p. 1310) Article

C94-204 Separation Control on High-Lift Airfoils via Micro-Vortex Generators. John C. Lin, Stephen K. Robinson, and Robert J. McGhee, *NASA Langley Research Center*; and Walter O. Valarezo, *McDonnell Douglas Aerospace* (**31**, 6, p. 1317) Article based on AIAA Paper 92-2636 CP926

C94-205 Study of an Airfoil with a Flap and Spoiler. Abdullah Al Shabibi, Munir Al Hammadi, and Joseph Mathew, *Sultan Qaboos University, Oman* (**31**, 6, p. 1324) Article

C94-206 Stratospheric Towed Vehicle Concept. Wubbo J. Ockels, Joris A. Melkert, and Alfred L. C. Roelen, *Delft University of Technology, The Netherlands* (**31**, 6, p. 1328) Article

C94-207 Navier-Stokes Prediction of Large-Amplitude Delta-Wing Roll Oscillations. Neal M. Chaderjian, *NASA Ames Research Center* (**31**, 6, p. 1333) Article based on AIAA Paper 92-4428 CP928

C94-208 Analysis of a Higher Harmonic Control Test to Reduce Blade Vortex Interaction Noise. Thomas F. Brooks, Earl R. Booth Jr., and D. Douglas Boyd Jr., *NASA Langley Research Center*; Wolf R. Splettstoesser, Klaus-J. Schultz, and Roland Kube, *DLR, German Aerospace Research Establishment*; Georg H. Niesl, *Eurocopter Deutschland, Germany*; and Olivier Streby, *Eurocopter France* (**31**, 6, p. 1341) Article

C94-209 Further Analysis of High-Rate Rolling Experiments of a 65-Deg Delta Wing. Lars E. Ericsson; and Ernest S. Hanff, *Institute for Aerospace Research, Canada* (**31**, 6, p. 1350) Article based on AIAA Paper 93-0620

C94-210 Engineering Transition Prediction for a Hypersonic Axisymmetric Boundary Layer. J. Stilla, *DLR, German Aerospace Research Establishment, Germany* (**31**, 6, p. 1358) Article based on AIAA Paper 93-5114

C94-211 Forebody Flow Control on a Full-Scale F/A-18 Aircraft. Wendy R. Lanser and Larry A. Meyn, *NASA Ames Research Center* (**31**, 6, p. 1365) Article

C94-212 Effect of Underwing Frost on a Transport Aircraft Airfoil at Flight Reynolds Number. M. B. Bragg and D. C. Heinrich, *University of Illinois at Urbana–Champaign*; W. O. Valarezo, *McDonnell Douglas Aerospace*; and R. J. McGhee, *NASA Langley Research Center* (**31**, 6, p. 1372) Article

C94-213 Pneumatic Concept for Tip-Stall Control of Cranked-Arrow Wings. Dhanvada M. Rao, *ViGYAN, Inc.* (**31**, 6, p. 1380) Article based on AIAA Paper 92-2637 CP926

C94-214 Structural Acoustic Calculations in the Low-Frequency Range. S. De Rosa and G. Pezzullo, *CIRA SpA, Italy*; and L. Lecce and F. Marulo, *University of Naples, Italy* (**31**, 6, p. 1387) Article

C94-215 Postinstability Behavior of a Two-Dimensional Airfoil with a Structural Nonlinearity. S. J. Price, *McGill University, Canada*; B. H. K. Lee, *National Research Council, Canada*; and H. Alighanbari, *McGill University, Canada* (**31**, 6, p. 1395) Article based on AIAA Paper 93-1474 CP931

C94-216 Dynamic Analysis of Bearingless Tail Rotor Blades Based on Nonlinear Shell Models. Olivier A. Bauchau and Wuying Chiang, *Rensselaer Polytechnic Institute* (**31**, 6, p. 1402) Article

C94-217 Static Pressure Distribution in the Inlet of a Helicopter Turbine Compressor. Johannes P. van der Walt and Alan Nurick, *University of the Witwatersrand, South Africa* (**31**, 6, p. 1411) Engineering Note

C94-218 Static Aeroelastic Characteristics of a Composite Wing. In Lee and Seung-Ho Kim, *Korea Advanced Institute of Science and Technology*; and Hirokazu Miura, *NASA Ames Research Center* (**31**, 6, p. 1413) Engineering Note

C94-219 Experiments on the Automatic Control of Boundary-Layer Transition. J.-L. Rioual, P. A. Nelson, and M. J. Fisher, *University of Southampton, England, UK* (**31**, 6, p. 1416) Engineering Note

C94-220 Method for the Prediction of the Onset of Wing Rock. Brad S. Liebst and Robert C. Nolan, *Air Force Institute of Technology* (**31**, 6, p. 1419) Engineering Note

C94-221 Inverse Solutions of the Prandtl-Meyer Function. O. Özcan, F. O. Edis, A. R. Aslan, and I. Pinar, *Istanbul Technical University, Turkey* (**31**, 6, p. 1422) Engineering Note

C94-222 Flow Study of Supersonic Wing-Nacelle Configuration. Kasim Biber, *Wichita State University*; and Joel Mendoza, *NASA Ames Research Center* (**31**, 6, p. 1424) Engineering Note based on AIAA Paper 94-0670

C94-223 Analytic Prediction of Lift for Delta Wings with Partial Leading-Edge Thrust. Lance W. Traub, *University of the Witwatersrand, South Africa* (**31**, 6, p. 1426) Engineering Note

C94-224 Computational Study of Plume-Induced Separation on a Hypersonic Powered Model. L. D. Huebner, *NASA Langley Research Center* (**31**, 6, p. 1429) Engineering Note

C94-225 Effect of Leeward Flow Dividers on the Wing Rock of a Delta Wing. T. Terry Ng, Tony Skaff, and John Kountz, *University of Toledo* (**31**, 6, p. 1431) Engineering Note

C94-226 Integration of the Supersonic Kernel Function. Louw H. van Zyl, *AEROTEK, South Africa* (**31**, 6, p. 1433) Engineering Note

C94-227 Redundancy in the Discrete-Vortex Method for Closed Bodies. Ashok Srivastava, *National Aeronautical Laboratory, India*; and Dean T. Mook, *Virginia Polytechnic Institute and State University* (**31**, 6, p. 1436) Engineering Note
